PMI PCB MUST

WIRELESS & CONNECTED PRODUCT HARDWARE DEVELOPMENT

From RF architecture and antenna integration to production-ready wireless hardware.

CONNECTIVITY

- BLE
- Wi-Fi
- Wi-Fi HaLow
- LoRa / LoRaWAN
- GNSS
- LTE / Cellular Integration

RF & HARDWARE

- RF PCB Layout
- Antenna Integration
- Low-Power Design
- Battery-Operated Hardware

PRODUCTIZATION

- EMI / EMC
- Pre-Compliance
- Production-Ready PCB Development

FOR MODULE / CHIP COMPANIES

Hardware-design partner for integrating wireless silicon into real products.

FOR PRODUCT COMPANIES

Connected product hardware development from concept to production.

OUR DEVELOPMENT LIFECYCLE

Architecture → RF Integration → PCB Development → Prototype → Validation → Production Handover
