

Who we are

PredictAYA is a Horizon Europe project bringing together multidisciplinary experts and patient representatives to improve personalised survivorship care for young cancer survivors.

What we are working on

We study late effects of cancer treatment and identify risk factors and biomarkers to better predict, prevent and manage long-term health challenges.

What's the one thing we need next

We are collecting clinical data across Europe to validate predictive tools and support personalised monitoring, counselling and follow-up care for young cancer survivors.

**5 years Mission Cancer:
Stronger Through Connection**
