Why clients talk to us

Faster execution
We help teams move faster, without lengthy recruitment processes.

Practical industrial understanding
We combine automation, software and implementation reality.

One partner from engineering to implementation
Automation, software, documentation and commissioning in one team.

Documentation and ownership
Clients retain ownership of the code, documentation and know-how.

LET'S TALK

Talk to us about supporting your team, migrations, industrial software, IT/OT integration and production monitoring.

ISCAS™
Industrial Software Experts

ISCAS™

INDUSTRIAL SOFTWARE · AUTOMATION · MIGRATIONS

Industrial software, migrations and documentation. Delivered fast.

We help industrial companies and solution providers build, integrate and modernize automation and software systems- from PLC and SCADA to production data and industrial applications.

IT/OT integration

Delivered fast

From migration to implementation

COMPASS

ISCAS' platform for production monitoring and improvement.

- See what is really happening on the shop floor
- Identify downtime, losses, and performance gaps
- Combine machine data with operator knowledge
- Make faster decisions based on reliable production data
- Start with one Area and expand as your needs grow

From production data to better decisions.

EXAMPLE VALUE AREAS

Offshore / Process Industry

PCS7/PCS neo migrations, HMI, documentation, FAT / IAT
and commissioning support for offshore and process / chemical plants.

Industrial Solution Providers

Automation and software development support for companies building scalable industrial products and systems.

Production Visualization

Real-time production visibility, OEE / KPI monitoring, traceability, reporting and faster response to downtime.

About ISCAS

Our focus includes industrial software development, migrations, documentation and implementation support.
We combine automation engineering and software development in one team.
From PLC and SCADA systems to databases, industrial applications and production monitoring, we help clients build solutions that can be maintained and developed long after implementation.

WHAT WE DO

Industrial System Integration

PLC, SCADA, databases, MES/ERP and industrial applications connected into one reliable data flow.

Control System Modernisation

PLC and SCADA upgrades, PCS7 / PCS neo migrations, FAT / SAT, commissioning and implementation support.

Electrical Design & Documentation

Electrical design, control cabinet documentation, BOMs, technical documentation and project handover.

Production Monitoring & COMPASS

Real-time production visibility, OEE / KPI monitoring, traceability, reporting and production data integration.

How we start cooperating

Discovery Workshop

- Process/installation analysis
- Identification of risks and opportunities
- Recommendation roadmap
- Quick decision on the next steps

Pilot/PoC

- Small, controlled scope
- Quick results
- Reduced risk before making a major investment

Team Augmentation

- 1–3 IT/OT specialists
- Full integration with the client's team
