

The path to funding your innovation starts here

Who we are

We are grant experts.

Argentum is a consulting firm that specializes in securing non-dilutive funds and R&D incentives for deep-tech companies across Europe. We lead hundreds of clients in a journey towards higher rates of participation in EU and locally funded projects in all areas of technology. With a dedicated team of analysts, project managers, group leaders, business development specialists and grant writers, we are determined to develop our clients' winning project proposals and to secure funding through our multi-submission strategy.

What we do

We get you funded.

The firm operates based on the 'Multi-submission' approach, wherein we maximise our clients' chances for success by applying to multiple funding opportunities throughout the year. The 'Multi-submission' plan varies and will always be aligned with the clients' field of expertise and their long-term business development goals. With over 100 funding directions that we have mastered, we are sure to create a well-tailored submission plan for you.

How it is done

We have streamlined the grant proposal submission process. By strategically submitting proposal to funding opportunities that align with our clients' needs, we enhance their chances of success. To fully enjoy the plethora of European funding sources, many of which require partnerships, we have created a set of tools, Argentum Consorita Link™, designed to manage partnerships efficiently and effectively for the purpose of successful grant submissions.

What our clients can expect to achieve from the first communication to achieving success:

Evaluation call

01

Evaluating the company's potential according to its grantable assets.

Start here

Strategic analysis and submission plan
