Powered by Meraxes

What is **Chatislav**?

Chatislav is an advanced AI chatbot platform that enables businesses to create custom AI agents using their own data. Powered by our **Iskon Prodigy LLMs**, with the offering of s.o.t.a AI models like Gpt-4o, Claude-sonnet, Gemini and others. It serves as an AI-powered customer support agent, e-commerce assistant, personal assistant, and many more.

Chatislav automates inquiries, streamlines conversations, and performs various tasks to enhance business efficiency, saving both time and money.

Key Features

Custom AI Chat Bots

Easily create and deploy AI chatbots using your own data, with no coding required. Automate conversations and enhance customer interactions effortlessly.

Versatile Usage for Any Industry

Chatislav is built to support a wide range of industries, making operations more efficient and improving customer interactions.

In e-commerce, it handles customer support, order management, and product inquiries. Healthcare businesses can use it for appointment scheduling and patient support, while finance teams can automate client interactions and streamline workflows. In real estate, it helps qualify leads and manage property inquiries. From education to hospitality, HR, and more

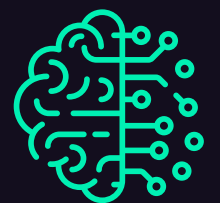

AI Workflow Agent

Beyond just answering questions, Chatislav acts as a fully capable AI agent, handling inquiries, processing requests, and performing various business actions.

Powered by Iskon Prodigy AI

Leverage our proprietary AI model for faster, more efficient, and context-aware responses. Supports all major AI models for maximum flexibility.

Multilingual Support

Chatislav is highly optimized for all major languages, ensuring high accuracy and natural communication.

Our model has been specifically trained for balkan regional languages along with all other world languages, improving fluency, contextual understanding, and precision.

No-Code Platform

Built for ease of use, Chatislav allows users to train and customize AI agents without any coding experience.

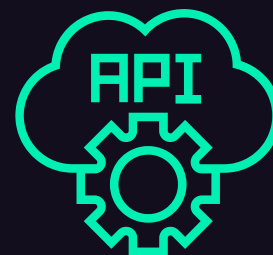

Proprietary Voice Models

Chatislav includes its own AI-driven voice models, enabling voice-based interactions for a more natural and responsive user experience.

Agent API Integrations

Chatislav offers API integrations, allowing businesses to seamlessly embed AI agents into their websites and other applications. This enables real-time interactions, automated customer support, lead generation, and other AI-powered functionalities without requiring complex in-house development.

CHATISLAV

AI Agentic Powered Customer Support

Instantly handles inquiries, processes refunds, and troubleshoots issues across multiple channels, reducing human workload and improving response times.

Lead Generation & High-Intent Qualification

Capture and nurture high-value leads effortlessly. Our AI engages visitors in real-time, amplifies existing buying intent. Convert web traffic into sales-ready prospects and boost conversions.

AI Agentic Powered Sales Experience

Recommends products, assists with purchases, and tracks orders, enhancing the shopping experience and reducing cart abandonment.

Real-World Application Examples

Smart FAQ & Knowledge Base Automation

Answers customer and employee questions instantly by pulling information from databases, manuals, and websites—reducing repetitive queries.

Surveys & Feedback Collection

Engages potential customers, qualifies leads based on intent, and seamlessly transfers high-value prospects to human agents, boosting conversions.

Sales Assistant

Empowers sales teams by handling inquiries, qualifying leads, and guiding prospects through the sales funnel. Automates follow-ups, provides product recommendations, and ensures seamless handoffs to human agents

Custom AI Solutions for Any Business

Chatislav is fully customizable, allowing businesses to request and implement any feature or functionality they need.

Chatislav boosts efficiency and reduces costs across industries. **It can cut customer support workload by up to 72%, automate 83% of repetitive inquiries, and increase response speed by 1000+%**, leading to improved customer satisfaction.

Businesses using AI-driven automation see a **37% increase in lead conversion rates and up to 42% savings on operational costs**.

Training & Customization

2025

Chatislav offers an intuitive dashboard for training and customizing AI agents. Businesses can upload any documents, videos, and other multimedia resources to train the agent, adjust appearance, create agent workflows, track conversation history, and analyze performance with built-in analytics.

The screenshot displays the Chatislav dashboard interface. On the left is a dark sidebar with navigation options: Training, Settings, Appearance, AI Agent (marked with a red 'NEW' badge), Chats, and Analytics. The main content area is titled 'Chatislav / My Bots / Test'. It features a 'FREE' status bar with usage metrics: 'Uploaded characters 661.5K / 10M', 'Messages remaining 10K', and 'Transcription time remaining 0m'. Below this is a 'Create bot' button and a list of bots including 'GSW Store', 'Demo', and 'Test' (which is selected). The 'Test' bot's configuration page shows 'Training data' instructions, a file upload area with a 'browse files' link, and a 'Data language' dropdown set to 'English'. A 'Start training' button is visible. At the bottom, there is a table for 'Uploaded files and links' with columns for Title, File type, Uploaded on, Used characters, Enabled, Cite as source, Status, and Actions. The table is currently empty.
