

Varioterm Group Capabilities

POSITION SENSORS

Rotary & Linear transducers, Encoders, Cable Extension Transducers, Speed Sensors, Inclination and Motorsport Sensors along with Displays and Interfaces.

PRESSURE

Pressure transducers & switches; gauge, absolute, differential, vacuum. For various environments; explosion proof, intrinsically safe & submersible options. Up to 5000 bar.

MOTORS & ACTUATORS

Full range of Brushless servo & stepper motors, direct drive and frameless motors, linear positioning, geared rotary actuators.

FOOTSWITCHES

Medical, Industrial and Custom footswitches in a variety of configurations and technologies including Bluetooth. Multi pedal options, guards, LEDs and accessories available.

LOADCELLS

Single point, S-Type, bending beam, shear beam, pancake, compression, fatigue rated, aerospace approved, marine and heavy duty.

BUTTONS & SWITCHES

Pneumatic, Electric, Pressure and infrared switches. Available in various colours and tube/ cable options. Custom models available on request.

TEMPERATURE

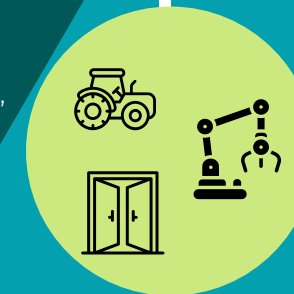

Thermistors, RTDs, Thermocouples, Temperature Switches including Hi Rel, Infrared, Temperature Probes with either standard or custom designs & various sensing elements.

MOTION CONTROL

Servo motors & drives, actuators, positioning systems & motion control solutions. Magnetic encoder kits & modules as well motor commutators.

MAGNETS

Tight tolerance control, precise pole location & very consistent magnetic performance - well suited for speed, commutation, encoding, counting & tachometry applications.

For your specific application, choose a custom solution, designed and manufactured by our dedicated team.
