

TOYOTA

To whom it may concern.

I Kevin Peters & Toyota manufacturing have been using the services of Kazimieruk Poland for a number of years, In those years Kazimieruk have supplied machined parts to a very high level with consistent quality.

I personally have worked with Andrzej & his colleagues to design improvements in current tooling as well as making from new and redesigning parts from overseas plant such as Japan so we can implement into TMUK's processes.

Kazimieruk are my first choice go to tooling specialists, I am very happy with the service, communication & quality of the work.

Kevin Peters

Die Maintenance Group leader
