SCENARIO X

We transform companies into digital-first organizations by **delivering next-gen technology solutions & services.**

32bit provides innovative solutions in the fields of fintech and digital transformation, **guiding clients in over 25 countries on their digitalization journeys.**

Serving various industries including finance, insurance, manufacturing, transportation, and logistics, 32bit leverages advanced technologies such as Artificial Intelligence (AI), Machine Learning (ML), Business Process Management (BPM), Robotic Process Automation (RPA), and image processing **to deliver value-driven hyperautomation services.**

As a trusted system integrator, 32bit works seamlessly with multiple stakeholders to design, implement, and manage large-scale projects, ensuring end-to-end coordination, robust integration, and long-term success.

Through strategic partnerships with leading global technology providers such as IBM, AWS, LSEG, Bloomberg, Automation Anywhere, 32bit continues to expand its comprehensive range of solutions.

Why 32bit

35+ Years of Integration Excellence

With over three decades of experience, integration is not just something we do — it's the core of our business.

Experts in Interoperability & API Ecosystems

Strong capabilities in ESBs, API gateways, and building secure, scalable, interoperable systems across complex architectures.

Proven in Digital Process Transformation

Track record of digitizing workflows, transforming public services, and implementing enterprise-grade document management systems.

Trusted Multistakeholder Integrator

Successfully managed multi-agency and multi-vendor projects — both in the public and private sectors — as a reliable systems integrator.

Global Reach, Local Focus

Serving customers in over 25 countries with strong, experienced senior teams ready to deliver and support national-scale solutions.

Your technology partner turning business processes into **intelligent systems.**

Integration

We seamlessly integrate even the most complex systems.

AI Solutions

We build intelligent software solutions that learn, predict, and support decision-making.

Digital Transformation

We help organizations stay ahead of the competition through technology-driven transformation.

RPA & Automation

We free up your workforce by automating repetitive and time-consuming tasks.

Custom Solutions

We design and develop tailor-made modern web and mobile solutions.

We **accelerate, integrate, and intelligentize** digital operations.

With our expert team and 37 years of experience, we deliver solutions that create **real value for organizations.**

Analysis

A detailed analysis of the current situation and organizational requirements.

Solution Design

Designing the most suitable solution tailored to business needs.

Development

Developing software aligned with the proposed solution.

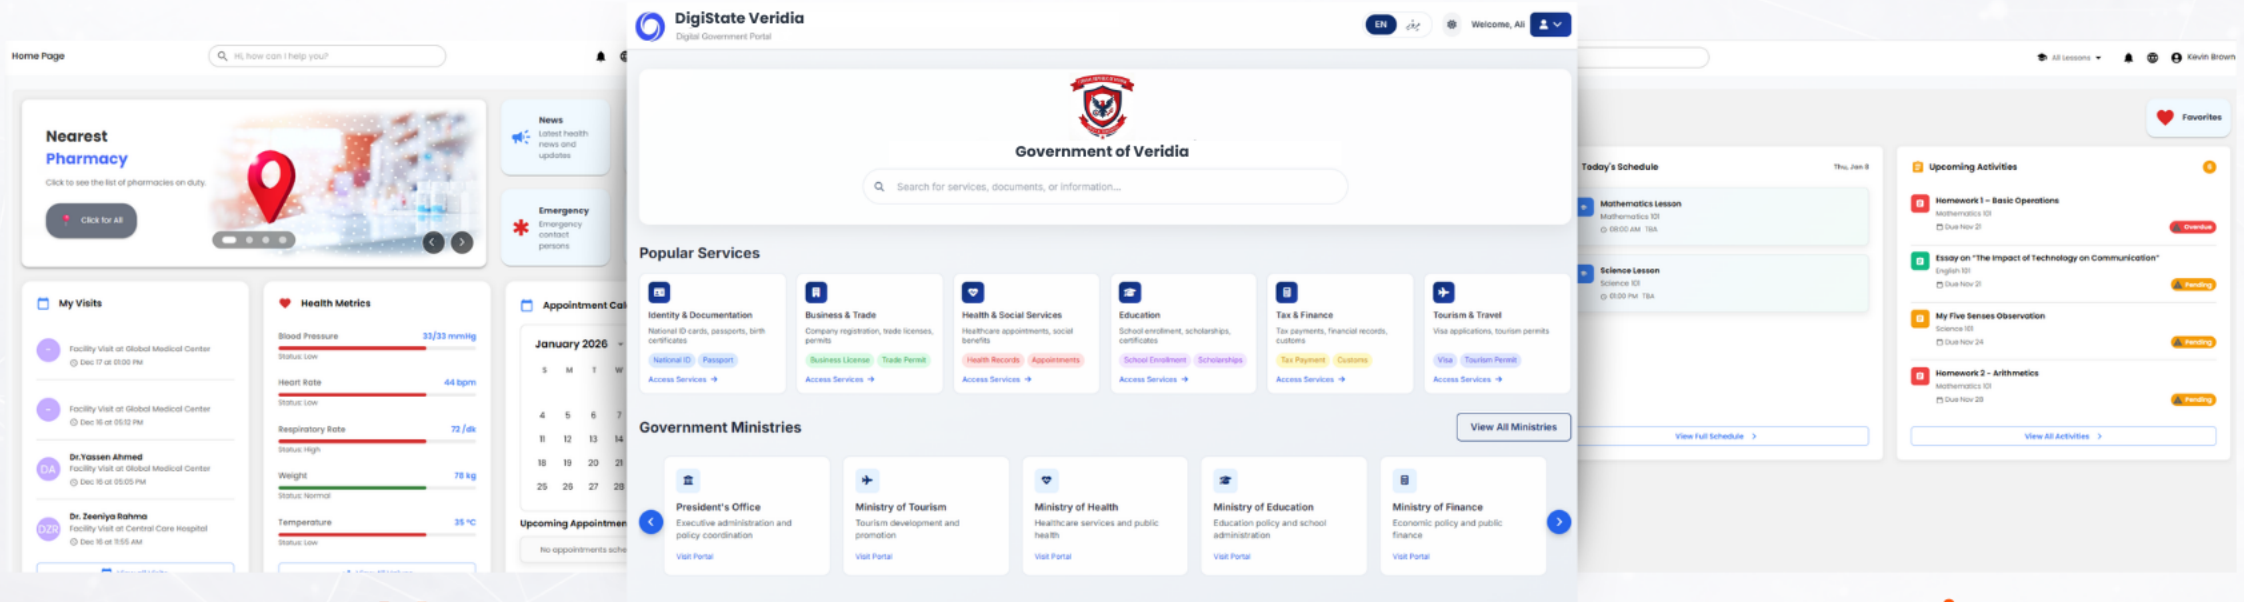

Competitive Advantage

Achieve a competitive advantage through lower costs and higher efficiency.

Building the Digital Backbone for a Responsive and Modern Government intelligent systems.

We provide **the foundational infrastructure to connect** citizens, healthcare, and education in **a unified digital landscape.**

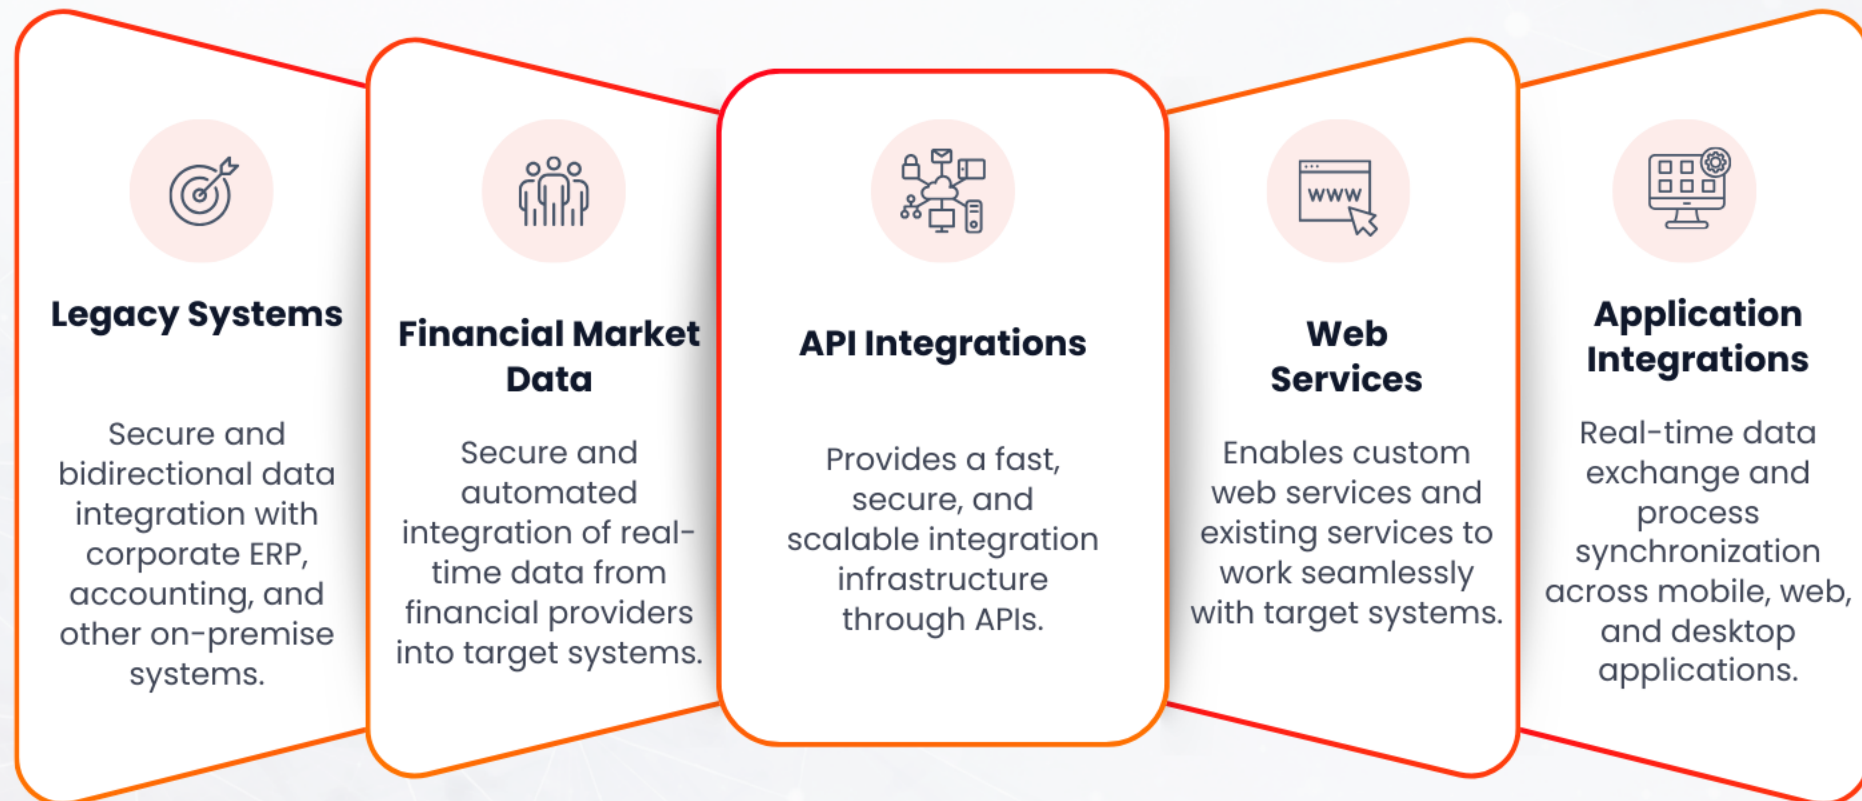

e-Health

e-Government

e-Learning

Integration Solutions

By integrating different systems, applications, and data sources, we increase **operational efficiency** and **ensure data integrity across all systems**.

From **smart agents** to predictive analytics, we provide the technology **to solve complex problems.**

AI Agents

AI agents that automate tasks and support decision-making.

Generative AI & LLMs

Generative AI and language models for content and conversation.

Intelligent Automation

AI-supported automation of repetitive and decision-intensive processes.

Computer Vision

Extraction and interpretation of information from images, documents, and video.

Prediction & Analytics

Predictive and analytical models to identify patterns, trends, and risks.

AI-Powered Service Solutions

AI-driven solutions for service delivery and operational efficiency.

Tailored Software Solutions

We develop software solutions tailored to organizations' specific needs, making business processes **more efficient, manageable, and sustainable**.

Mobile & Web Applications

We develop custom web and mobile applications tailored to our customers' needs.

Seamless Integration

We develop software solutions that integrate seamlessly with external systems.

Open-Source

We leverage open-source technologies to deliver cost-effective solutions.
