

Actionable Sustainability

AI + Smart Carbon Management

Cut emissions. Simplify compliance. Boost transparency.

Carbon emissions visibility is the need of the hour

Climate change

The overwhelming scientific consensus is that climate change is caused by human activities, primarily the burning of fossil fuels, which release greenhouse gases into the atmosphere.

Government Regulations

Governments around the world are increasingly implementing regulations to reduce greenhouse gas emissions. Most require public listed companies to report Scope 1, 2 & 3 GHG.

Economic Benefits

Economic benefits to carbon management, including reduced costs for businesses, increase revenue, meet customer demand, investor pressure, and a desire to be seen as a responsible corporate citizen.

PlanetWise: Unlocking Sustainability Goals

Measure: Accurately quantify and report carbon emissions (Scope 1, 2 and 3) adhering to recognized standards (e.g., GRI, GHG Protocol, TCFD, CDP, ISSB, ISO 14064).

Manage: Streamline data collection, analysis, and reporting through automation, AI/machine learning, and user-friendly interfaces.

Reduce: Identify and prioritize cost-effective reduction opportunities through data-driven insights, target setting, benchmarking and scenario modeling.

Remove: Integrate offset options and facilitate seamless participation in carbon markets for comprehensive carbon neutrality strategies.

Report: Record and disclose sustainability performance to stakeholders in accordance with international standards like GRI, BRSR and TCFD.

PlanetWise: Unique Solution To Meet Sustainability Challenges

Focus on Collaborative Supply Chain Decarbonization:

PlanetWise emphasizes engaging suppliers and promoting transparency throughout the supply chain.

Comprehensive Solution: A perfect combination of software, data, and expert services, providing a holistic approach to carbon management and sustainability reporting.

Alignment with Industry Standards: Compatibility with leading reporting frameworks simplifies compliance and reduces reporting burdens.

Data-Driven Insights: By automating data collection and analysis, PlanetWise helps businesses identify areas for improvement and focus on sustainability goals.

Why Choose PlanetWise?

Expertise

A team of industry-leading sustainability professionals with extensive experience in carbon management

Technology-Driven Approach

Utilize cutting-edge systems to provide actionable insights and data-driven solutions

Global Reach

Serving a diverse clientele across Singapore, India, Vietnam, Malaysia, and beyond

Proven Track Record

Success stories and case studies showcasing measurable results for our clients

Singapore (HQ)

Malaysia

Vietnam

India

Our key customers feedback

- Very satisfied with our platform
- Find our platform intuitive and easy to use
- Report over a 60% improvement in productivity
- Confident that our platform can significantly support their sustainability goals

Based on customer satisfaction survey Q3 2025

Use Case: Large Customer in logistics sector – ST Logistics

- PlanetWise user since January 2024
- Collaborate with suppliers (“Queen Bee”)
- Manage Scope 3 emissions through supplier engagement
- Track performance at facilities, as well as asset-level
- To incorporate sustainability KPIs into contracts...

Use Case: Leading Education Institution – Republic Poly

- Intuitive Setup: Get started quickly with our user-friendly interface.
- Transparent Emission Factors: Access clear and comprehensive emission factors, ensuring accuracy and transparency in your calculations.
- Industry Standards Compliance: Confidently report your emissions, knowing that PlanetWise aligns with recognized standards like ISO 14064-1 and GHG Protocol.
- Secure Collaboration: Streamline audits and collaborate seamlessly with external stakeholders through secure data sharing.

Use case: Confederation of Indian Industry

- CII has launched the “CII Net – Zero Program” with the objective to “Steer decarbonization pathways by enabling companies & corporates to commit and accelerate actions towards Net – Zero emissions”.
- Stream 1 – Transition towards Net-zero emissions (addressing scope 1 and 2)
- Stream 2 – Enhancing sustainable supply chain (addressing scope 3 emissions)
- PlanetWise platform is selected to facilitate training and supplier engagement.

Confederation of Indian Industry

Use Case: Environment Consulting Services

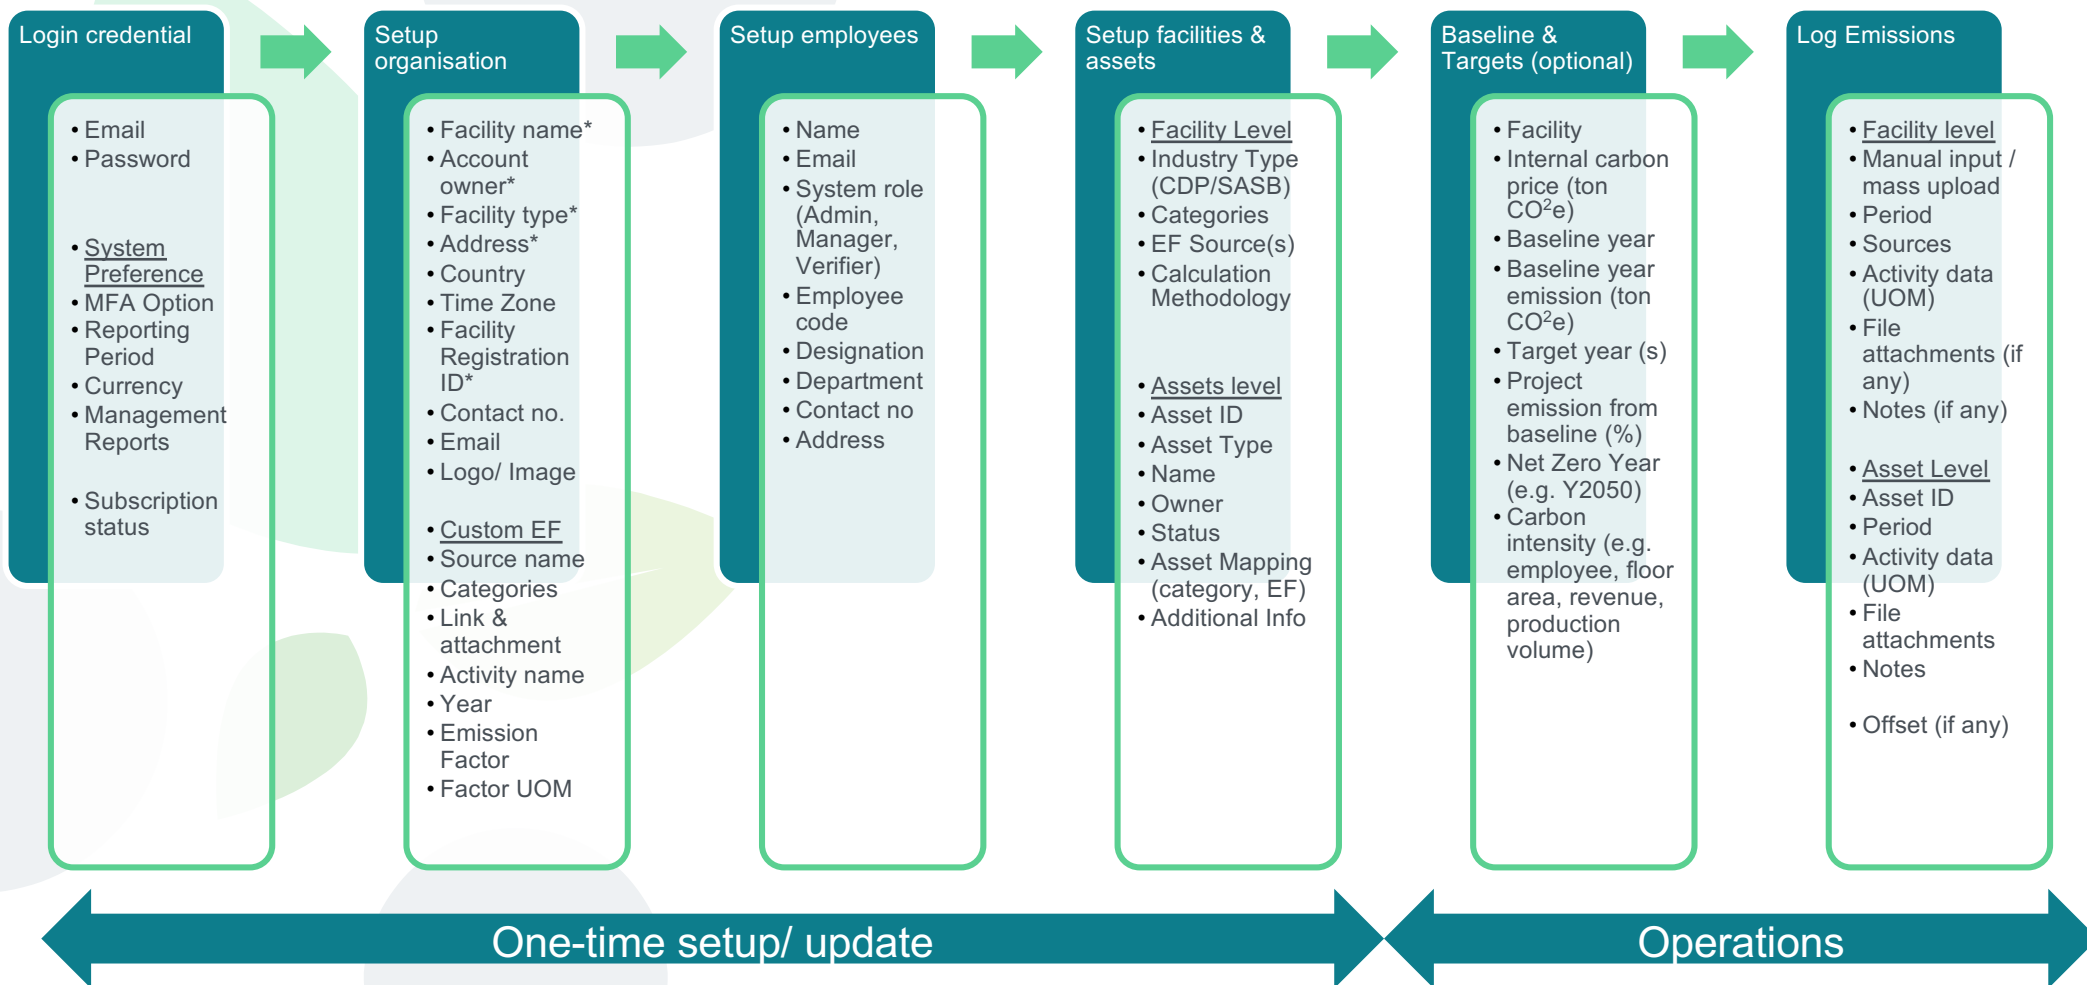

- Provides environmental consulting services to help businesses and organizations minimize their ecological footprint.
- Partnered with PlanetWise CMS to transition its GHG inventory clients to digital monitoring from manual calculation
- Expanded to 5 customers (facilities) within first 4 months of subscription.
- Productivity of consultants improved significantly with the deployment of PlanetWise solutions.
