

Advanced NW Nonwoven Systems for Construction, Infrastructure & Defence.

LAYRONTEX is a high-performance NW nonwoven and Polymer Film products platform developed by AzimuthLink.

We engineer functional layers that protect, insulate, waterproof, reinforce and defend — from rooftop to road surface to battlefield.

LAYRONTEX BUILD	LAYRONTEX PAVE	LAYRONTEX ARMOUR	LAYRONTEX STEALTH
- Roofing underlays - Vapour barriers - Floor underlays - Waterproofing membranes	- Asphalt interlayers - Stress-relief paving fabric - Bridge deck seals - Self-healing road NW *	- Ballistic soft panels - UHMWPE UD composites - Blast & spall liners - Drone body NW *	- IR thermal camouflage NW - Omni-spectral signature mgmt - EMF shielding NW - CBRN barrier *

* Innovation pipeline — patent applications in preparation. Details available under NDA.

Why LAYRONTEX?

- **Turkey-based manufacturing** Domestic fason production via certified partners. Fast lead times, competitive FOB pricing.
- **30+ years of international trade** AzimuthLink network spans 90+ countries — MENA, Central Asia, Balkans, Sub-Saharan Africa.
- **Innovation-first roadmap** 6 patent applications in preparation. TEKMER R&D centre registration in progress.
- **Full spectrum coverage** One platform: building envelope + road systems + personal & vehicle protection.

Manufacturing partners (needlepunch / spunbond / lamination) | Distributors (MENA · Central Asia · Balkans) | R&D co-invest
