

Siret City Hall

INDUSTRIAL & RDI Hub Siret

- ⚙️ Industrial park
- ⚙️ Science and technology park
- ⚙️ Technological, vocational & dual education

Ec. Adrian Popoiu

Mayor of Siret City

The city of Siret was a well-developed industrial center during the communist period, but it has fallen a lot in the last 25 years. To revive the local economy, we have defined a strategy to support the business environment in the city of Siret, and the local administration has become a close partner of companies interested in investing in the area.

The development of the business environment is vital for the development of cities and is carried out in close accordance with a series of absolutely mandatory facilities that we already have or are currently implemented through projects financed with European funds:

- > we have set up an industrial park and we can offer the related fiscal facilities;
- > we expand and modernize the school infrastructure for vocational and technical education, including dual education;
- > we are building a science and technology park where research, innovation and technology transfer activities will take place in partnership with Ștefan cel Mare University of Suceava.

The added value of this area is given by the fact that the industrial park is located exactly at the end of the A7 highway and only 100 km from the future A8 highway.

The city of Siret is making significant efforts to create an investor-friendly environment. Dual education, vocational and technical education, business support infrastructure and research and development infrastructure are at the forefront of our focus. In the coming years we aim at becoming a development hub that successfully brings together the interests of local authority, academia and business for the benefit of the entire region.

Adrian Popoiu

Sebastian Metz

**General Manager,
Board Member of AHK România**

As the official representative of the German economy in Romania, we have, among other things, the honorable mission to discover hidden gems in the economic development regions of the host country in order to offer German investors the most suitable locations for their activities. For some time now, we have been focusing on the Northeast Region. This aspect involved multiple projects in that area, business delegations, economic missions, working visits.

I visited the city of Siret with my colleagues and I was able to see with pleasant surprise how the local authority understands to promote the city, the region as an investment location. It is a holistic complex approach, from a vocational school in a dual system, an industrial park near the border with Ukraine to a technological and science park which will be operational at the end of 2022 in which German technology will surely find its place.

Romania's cities and regions are still in a process of adaptation, of learning in terms of marketing. Some move faster, the

learning process being dynamic and agile, others lag behind.

Siret, a small town on the Northern border of Romania is successfully trying to position itself year after year on the map of cities with an attractive offer. Representatives of Siret participate with perseverance at top national or international events, improving their offer from year to year, thus presenting themselves more and more professional and implicitly more convincing.

The city of Siret is an example of good practice in the North-East Region with a continuous development that we cannot but recommend to investors from any part of the world.

We wish them success and may their diligent efforts bear fruit as soon as possible!

Available workforce. In Suceava County, the number of jobs per 1000 inhabitants is twice as low as compared to the counties in Western Romania. Also, the Ukrainian workforce may also be attracted. Siret custom is the only custom in Suceava that allows pedestrian crossing from Ukraine to Romania.

Qualified workforce – technological high school, vocational school and dual education. In the Siret city , a technical college operates , which educates over 1300 students, of which 550 follows technological field. The approached specialization are transport technician, car mechanic, industrial machinery and equipment mechanic, textile technician.

In Siret City is being built a science and technological park , which will address the fields of Industry 4.0, Smart City and Smart Tourism. The infrastructure works will be completed in December 2022. Partners in this project are Suceava County Council and „ Stefan cel Mare „, University of Suceava.

The average gross salary in Suceava County is lower by 100-190 Euros compared to the average net salary being paid in Western Romania.

Road and air accessibility is equivalent to the locations in Transylvania (Cluj-Napoca, Turda, Brașov, Bistrița etc). Road accessibility is ensured through Ukraine and Poland.

5 reasons to invest in

INDUSTRIAL & RDI
Park Siret

INDUSTRIAL & RDI Park Siret

1. Industrial Park

- > 12 hectares of land available;
- > Tax exemptions for land and buildings;
- > Labor force available in Suceava and Botosani counties;
- > External labor force available in the Chernivtsi Region/ Ukraine;
- > The industrial park is located near the European road E85, the future A7 highway and 100 km from the future A8 highway.

2. Technological Education

- > „Latcu Voda” Technical College Siret – Technical high school that educates 1300 students (550 on technological profiles).
- > Specializations: transport technician and textile technician;
- > Skills acquired in the automotive area: CAD design, locksmithing, operation of CNC machines and logistics.

3. Vocational and dual education part of the Technical College „Latcu Voda”

- > Vocational school – car mechanic qualification;
- > Dual education – mechanical qualification of industrial machines and equipment;
- > Workshops and laboratories: CAD design laboratory, textile laboratory, locksmith workshop, CNC machine workshop, textile workshop.

4. Qualification/ requalification of the labor force

- > Educational center for lifelong learning
- > Center structure:
 - Conference room with 100 seats;
 - Two training rooms with 30 seats;
 - The center will have an educational module in the field of robotics;
 - Partners in the educational field „Latcu Voda” Technical College Siret, „Stefan cel Mare” University of Suceava.

5. Research, innovation and technology transfer

- > Siret Science and Technology Park – ongoing project. The infrastructure works will be completed in December 2023;
- > Smart specialization areas addressed: Industry 4.0, Smart City, Smart Tourism;
- > Park structure:
 - Industry innovation platform;
 - Manufacturing Laboratory (FABLAB) the IT Open Source HUB;
 - Counseling offices;
 - Office spaces for rent.
- > Partners within the project: Siret City Hall, Suceava County Council „Stefan cel Mare” University of Suceava, SC Industrial Park EEB Siret;
- > Supporting partners: AHK Rumanien – Romanian-German Chamber of Commerce, „Yurii Fedcovici” University Chernivtsi/Ukraine.

FACILITIES FOR INVESTORS	<ul style="list-style-type: none"> ▪ Exemption from land tax; ▪ Exemption from building tax; ▪ Companies can resort to state aid schemes provided by the Romanian Ministry of Finance. 	

Strategic position

Through its location at the eastern border of the European Union, Siret Industrial Park is as accessible for Western Europe as the parks located in Transylvania, offering multiple opportunities for investors.

It connects the European Union market with the non-EU states and acts as a middle ground for production facilities and goods exchange between NORTH (Ukraine, Belarus, Baltic States), SOUTH (Greece, Turkey and the Middle East), EAST (Russia and former soviet countries) and WEST (Poland, Germany, France and the Netherlands).

Siret offers the same accessibility to Western Europe as Transylvania does. It's as close to Amsterdam as Cluj and Brasov are, but it's a more financially advantageous alternative. Costs related to salaries are

lower and the available workforce is higher in number as compared to Romania's central and western counties.

Annual traffic through Siret Customs*

Siret Customs has an average throughput of 250 cargo trucks per day.

Siret Customs is the only customs checkpoint in north-eastern Romania allowing freight cars to pass through. The nearest customs points are Halmeu, 400 km to the west, on the border with Hungary and Albița, 250 km to the east, on the border with the Republic of Moldova.

Siret

Total area offered for rent or sale: 11,29ha
Possibility of expansion: 25 ha

E
22.004,46 m²

Tax incentives granted to residents of the park:

- > Exemption from tax on land use within the park
- > Exemption from tax on buildings for constructions within the park

These facilities may be granted under the de minimis aid rule or if initial investments made in industrial parks can take the form of regional state aid. The exemptions granted under the de minimis aid can not exceed 200,000 euros over 3 consecutive years.

When calculating the total amount of de minimis aid all exemptions are cumulated.

More than that, companies that will operate in Siret Industrial Park East European Border can also resort to state aid schemes managed by the Ministry of Finance.

Buildings adjacent to the Park

- Fuel station
- Hotel
- Siret Customs Office
- Bus Station

Cumulative minimum conditions for admission to Siret Industrial Park EEB

- > Minimum investment: 100,000 euros
- > Minimum jobs created: 30
- > Amount invested: a minimum of 70 EUR /mp (relative to the total area of land for which the offer is submitted);
- > Value of completed constructions (buildings & constructions with roof) plus fixed assets (except for concrete platforms);
- > Occupancy of the land: constructions with roof built on an area of minimum 20% of the land, relative to the total area of the land for which the offer is submitted.

Potential area for attracting workforce to Industrial & RDI Park Siret – Romania & Ukraine

Siret has always been a major economic hub attracting workforce from a radius of 30-40 km around the city. In stark contrast to the communist period, when only local workforce could be counted on, external recruitment from Ukraine is also possible at this moment.

On the Romanian side, Siret can attract workers from the adjacent cities of Siret, Rădăuți, Suceava, Botoșani and Dorohoi. Population in this area amounts to 312 916

people. On the Ukrainian side, regions of Storozhynets, Chernivtsi and Herta amount to 271.715 inhabitants.

In total, the population inside the potential area for attracting workforce rises to 584.631 inhabitants.

Siret Customs is the only customs in Suceava County that allows pedestrian crossing from Ukraine to Romania.

Airline accessibility

The nearest airport to Siret Industrial Park EEB is Suceava International Airport, 43 km away. It has been recently modernized in 2016 and has direct flights to Bucharest, London and Milan. More destinations are to be operated in the near future. Also, in the future, a cargo terminal is to be added to the airport infrastructure.

Iași International Airport is located 168 km away, a 2h30m drive. It has direct flights to Bucharest, Vienna, London, Paris, Madrid, Munich, Rome, Tel Aviv, Paris, Bruxelles, Koln, Milan or Larnaca.

Otopeni International Airport in Bucharest can be reached by direct flight from Suceava and the flight takes only 1h. From here, any destination in the world is available.

Workshops, laboratories and amphitheater within the Lațcu Vodă Technical College Siret City

This technical college includes: a technological high school with the profiles of transport technician and textile technician and a vocational school with a car mechanical profile for vocational education and a mechanical profile of industrial machinery and equipment for dual education.

The building includes:

1. A CAD design laboratory equipped with:
 - a. PC workstations for 30 students
 - b. CAD - CAM - CAE type software (NX Siemens)
2. A CNC machine workshop equipped with:
 - a. A CNC lathe (Knuht)
 - b. A CNC milling cutter (Knuht)
 - c. A conventional lathe (Knuht)
3. A locksmith workshop equipped with:
 - a. Hexagonal workbenches
 - b. Tools specific to the locksmith field
4. A textile laboratory equipped with:
 - a. PC workstations for 30 students
 - b. Laboratory equipment
 - c. Clothing design software
 - d. Software for automated tailoring
 - e. Embroidery software
5. A textile workshop equipped with:
 - a. Sewing machines of different types (linear sewing, triplok, überdeck, button sewing, etc.) (Durkopp Adler)
 - b. Embroidery machine
 - c. Automated cutting machine (GeminiCad)
6. Amphitheater with 100 seats

EEB Siret Science and Technology Park

The project is funded by the Regional Operational Program 2014-2020.

Ongoing project with infrastructure completion deadline in December 2022. Siret Science and Technology Park will be built within the Siret Industrial Park.

Through this project, a building will be built and equipped in which the Siret Science and Technology Park will operate and two studies will be carried out, one on the degree of implementation of Industry 4.0 solutions within companies in Suceava County and the second one on the degree of implementation of Smart City and Smart Tourism solutions in the localities from Suceava county.

Deadline - December 2023.

The founding consortium of the EEB Siret Science and Technology Park consists of:

- Siret Town Administration;
- Suceava County Council;
- "Ştefan cel Mare" University of Suceava;
- SC Industrial Park EEB SRL Siret.

Support partners:

- Romanian - German Chamber of Commerce, Romanian AHK;
- Yurii Fedcovici University Chernivtsi / Ukraine;
- Chamber of Commerce and Industry of Romania, Suceava Branch.

The structure of the Siret Science and Technology Park:

1. An innovation and training center in the field of Industry 4.0, with equipments Bosch Rexroth
2. A FABLAB that will be equipped with:
 - CNC 5 axis & CNC 3 axis (DMG MORI);
 - Laser cutter;
 - 3D scanner and 3D printer;
 - Design office equipped with computers, software (NX Siemens).

3. An IT Open source HUB that will include:

- An open space with 40 IT workstations;
- 2 meeting rooms with a capacity of 10-12 people, each;
- 3 advisory offices (technology transfer and intellectual property, Industry 4.0 and Smart Destination).

4. Office spaces for rent (5 spaces with a total area of 300 sqm).

Activities to be carried out within the park:

- Research and innovation activities in the field of Industry 4.0 and Smart Destination (Smart City & Smart Tourism);
- Prototyping activities and manufacturing of the zero series of the product;
- Small series production activities;
- Consulting in the field of technology / refurbishment;
- Consultancy in the conversion of equipment from Industry 3.0 to Industry 4.0;
- Consulting in the field of Smart destination (smart city & smart tourism). Applying intelligent solutions in the field of urban development and in the field of tourism;
- Consultancy in the field of intellectual property;
- Training for company management staff and for employees in the field of Industry 4.0;
- Development and testing of new production processes through robotics and automation (Industry 4.0);
- Development and testing of solutions for product traceability in the production chain (Industry 4.0);
- Software development and testing for Industry 4.0 and Smart Destination;
- Laboratory or practice activities for students;
- Laboratory and practice activities for students in technological high schools and students in vocational and dual education

Educational center for lifelong learning

Ongoing project financed with European funds (Regional Operational Program 2014 - 2020). Estimated completion date - April 2023. The building is being built within the Siret Industrial Park and will operate under the coordination of Siret City Hall.

This objective will include:

- A conference room with 100 seats with an adjacent area for coffee breaks;
- Two training rooms of 30 seats each;
- An exhibition hall of 400 sqm;
- Modular meeting room with 20 seats (10 + 10);
- Gym;
- Sports field;
- The center will be equipped with an educational module in the field of robotics.

Activities that will be organized within this educational center:

- a) Training activities and development of professional skills;
- b) Literacy activities, remedial education and adequate educational support;
- c) Personal and community development activities and leisure.

Educational partners that offer support to the activities to be organized:

- "Lațcu Vodă" Technical College Siret
- "Ștefan cel Mare" University of Suceava
- Companies interested in qualifying the existing local workforce

Education and Training

Siret “Lațcu Vodă” Technical College

The current “Lațcu Vodă” Technical College continues the legacy of the former Auto Industrial High, renowned in the communist era for its excellent students in automotive mechanics.

Here, over 1350 students are instructed in technical, theoretical and vocational fields.

In the 2020-2021 education cycle, the graduates from technical and vocational fields were as follows:

SECONDARY EDUCATION – TECHNOLOGICAL BRANCH

Transport Technician – 79 graduates
Textile and leather goods industry technician – 23 graduates

VOCATIONAL BRANCH

Auto mechanic – 76 graduates

The theoretical branch offers 3 courses, of which only one grants a certificate of professional competence.

SECONDARY EDUCATION - THEORETICAL BRANCH – Mathematics and Computer Science
Training in computer operation – 21 graduates

199 GRADUATES OBTAINED SOME FORM OF A PROFESSIONAL COMPETENCE CERTIFICATE, IN 2021.

Siret City and Bukovina

Siret is one of the oldest cities in Romania and has a history of over 6 centuries. It was the first capital city of Moldavia in the 14th century and an important crafts and commercial hub. The first Roman-Catholic Diocese of Moldova was established here as well as the first school of the Principality, with teaching in Latin. Therefore, the city became an important religious and cultural centre.

A resting place along the Via Walachensis, Siret developed continuously and attracted people on a 60 km radius. People from all over Bukovina came to Siret to work in oil refining, woodworking, glassware, soft goods and food goods.

Siret City is located in the border area that separates Southern Bukovina (Romanian territory) from Northern Bukovina (Ukrainian territory). Both are known as top tourist destinations, where one can find UNESCO monuments, castles, museums, artisans and craftsmen, authentic folklore and very hospitable hosts - quality hotels and pensions.

As an important customs point of the European Union, Siret is nowadays a city open to investors, in an excellent position to facilitate commercial exchange inside and outside the EU territory.

BUKOVINA-called Buchenland in German, is a region that will make you miss it the moment you need to say goodbye.

Here, each season is a story sprinkled with picturesque landscapes and experiences that stir your appetite for life. Bukovina has lots of opportunities for relaxation and quality time: unique tourist spots,

part of UNESCO heritage, great resorts for winter sports and stunning mountains, perfect for outdoor activities and leisure.

The most popular tourist destinations in Bukovina are Sucevița, Gura Humorului, Câmpulung Moldovenesc and Vatra Dornei mountain resorts. All have a large number of hotels and guesthouses that provide very good accommodation. Sucevița is just a 35 km drive away from Siret and Gura Humor is reachable within one hour by car.
