

Who we are

UNCAN-Connect is a five-year Horizon Europe project uniting 53 partners across 19 countries to build the foundations for UNCAN.eu.

What we are working on

We are developing the UNCAN.eu central platform to connect cancer researchers across Europe with digital assets, including annotated datasets, cohorts, AI models, software tools, workflows and reports, and make these resources easier to discover, access and reuse.

What's the one thing we need next

We need Cancer Mission projects to bring forward concrete digital assets, together with information on their maturity, metadata and access conditions, so that we can test how well UNCAN.eu supports their discovery, access and reuse by researchers.

**5 years Mission Cancer:
Stronger Through Connection**
