

Roll Drap®

Texia Group

TEXIA is a family-run textile group founded in Barcelona over a century ago, in 1917.

Thanks to our team's experience, creativity, and innovation, **we create and manufacture high-quality textile products** using **our patented SeamlessTEX technology**, which eliminates the need for traditional sewing. This revolutionary manufacturing process has enabled us to market our products all over the world.

Building on this innovative technology and other advanced accomplishments in finishing, we launched our brands Roll Drap in 1995 and My Drap in 2010.

This new approach has enabled us to diversify our customers and sales channels, leveraging value in each stage of the sales chain to reinvest profits into developing new ideas and expanding our product portfolio by acquiring Athos and to maintain **TEXIA FINISHING**, our finishing and printing division.

Today, our products are used by leading restaurants, hotels, airlines, cruise ships and caterers worldwide, and can be found at luxury boutiques around the world. We export 80% of our production

from our factory in Monistrol de Montserrat, with our subsidiary in Canada supplying My Drap products to the North American market.

"Drawing from our five foundational principles - **quality, experience, creativity and innovation, agility, and sustainability** - at **TEXIA**, we enthusiastically embrace the responsibility of contributing to making the textile sector more sustainable. Revolutionizing our business to a vertical corporation enabled significant control over our supply chain and sales channels and has allowed us to coherently apply the values we wish to convey to the end consumer and society."

"We're proudly a part of the **Better Cotton Initiative (BCI)**, a global initiative that promotes sustainable practices in cotton farming. Additionally, part of our My Drap products are biodegradable and compostable, all while maintaining our high quality standards, backed up by our many certifications (GRS, GOTS, Oeko-Tex, etc.). Furthermore, to guarantee our mission, we ensure sustainable management of our textile waste and upcycle thread and cotton to give our My Drap products a second lease of life."

Discover our
Environmental Policy

A range of **100% cotton** textile products that hotel and catering professionals choose for the hygiene of their establishments.

For 30 years we have been offering textile products that stand out for the quality of their fabrics.

Our commitment to sustainability

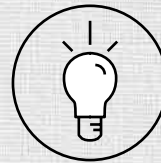

Members of the Better Cotton Initiative (BCI)

Improving global cotton production both for the people who produce it and for the environment it grows in, to create a better future for the sector.

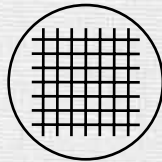

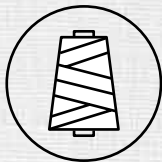

100% natural raw materials

High quality socially and environmentally responsible raw materials.

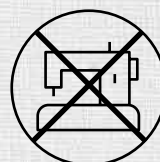

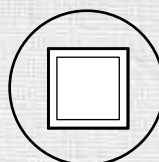

R&D + ECO

We're always innovating to design new products and redesign classics to make them more environmentally friendly.

Suppliers

We annually evaluate all our suppliers under sustainability standards.

Texia-patented Seamless technology

Having no seams means one fewer link in our production chain. This reduces energy use.

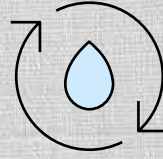

It saves on time, transport and labour.

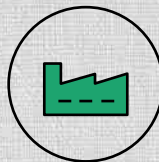

Atmospheric emissions

We carry out annual reviews of our emission sources.

water management

We carry out a daily control of the entire water circuit, we clean our wastewater and consume it.

Factory

We have a cogeneration plant that allows us to reduce natural gas consumption.

Local production

Our facilities are located in Barcelona province and comply with European regulations.

Waste management

We continuously improve the segregation, recycling and recovery of our waste.

Certifications

GOTS

The world-leading standard for the certification of textiles made with organic fibers in accordance with strict environmental criteria.

GOTS: EGL/192987

OEKO-TEX STANDARD 100®

A world-renowned system that checks there are no harmful substances in textiles or at any stage in a product production.

OEKOTEX: 2021OK179

Member of the BCI

The Better Cotton Initiative (BCI) program's aim is to improve global cotton production for the people who produce it and the environment in which it grows to create a better future for the industry.

GRS

Our Global Recycled Standard (GRS) certification complements our Recycled Claim Standard (RCS) certification and guarantees that textile materials are recycled in compliance with environmental and social criteria.

GRS: EGL/192987

ISO 14001:2015

This certification recognizes the growing importance of the way companies manage their processes from an environmental point of view, and sees leadership as key to the proper functioning of the Environmental Management System.
