Welcome Message

Mayor of Thessaloniki

As the Mayor of Thessaloniki, it is my great pleasure and privilege to welcome you to our vibrant city for the CIVITAS Forum 2026!

Thessaloniki is a city where history runs deep — a historic crossroads of cultures and civilisations for over two millennia.

As we face the pressing challenges of the climate crisis, Thessaloniki is actively transforming its urban landscape. Our administration is committed to an ambitious, green, and digital transition. We envision a more sustainable, resilient, and accessible city that elevates the quality of life for all residents, workers, and visitors alike.

Urban mobility is at the very heart of this transformation. The launch of our new Metro system, the rapid electrification and modernisation of our public bus fleet, the expansion of smart traffic management, and our ongoing efforts to reclaim public space through extensive pedestrian and waterfront rejuvenations are reshaping how people move.

I encourage you to explore Thessaloniki, experience our famous hospitality, and witness our urban evolution first-hand. I am confident that the insights gained here will leave a lasting legacy for all cities, reinforcing our shared commitment to building a greener, smarter, and more connected urban future.

Welcome to Thessaloniki!

Stelios Angeloudis
Mayor of Thessaloniki

CONFERENCE OVERVIEW

The CIVITAS Forum 2026 returns as a vibrant three-day conference and the flagship event of the CIVITAS Initiative. From 15 to 17 September 2026, the CIVITAS community will gather in the coastal city of Thessaloniki, Greece, to exchange practical solutions and build partnerships that accelerate the transition to sustainable, smart and inclusive urban mobility across Europe.

Since its creation in 2003, the CIVITAS Forum has established itself as a leading platform where participants learn from mobility leaders and experts, share ideas grounded in real-world experience, and connect with the key actors shaping the future of urban mobility. The Forum brings together city authorities, policymakers, practitioners, planners, researchers, civil society and industry – all working to make urban mobility cleaner, safer and more resilient.
