

Pre-Deployment Hostile Environment First Aid Training

Optimise

This comprehensive course equips individuals with the critical skills and knowledge needed to stay safe and respond effectively in hostile conditions. Investing in robust safety and security measures not only protects employees but also demonstrates a company's global responsibility and commitment to ethical operations.

Empower

Lazarus Training's Pre-deployment HEAT empowers field personnel by equipping them with critical skills to navigate and operate confidently in high-risk situations. Through hands-on practice, expert guidance, and realistic scenarios, attendees gain the tools needed to ensure their safety and resilience while operating in hostile environments.

Why Choose Lazarus Training

With a track record in challenging environments including, but not limited to, Afghanistan, Kenya, Kyrgyzstan and Ukraine, Lazarus Training brings global best practices to those deployed to Ukraine. We customise our training to reflect the unique challenges of the Ukraine context, ensuring all delegates receive practical and applicable skills. This reflects the UK's leadership in security and safety training fostering a deeper UK-Ukraine collaboration in safety and protection.

- Proven Expertise
- Custom-Tailored Programs
- Real-World Relevance: Practical, Scenario-based Training
- Comprehensive Support

Pre-Deployment Hostile Environment Awareness Training

- Tailored for Professionals Deployed to Ukraine: The curriculum addresses the unique risks faced by field personnel operating in conflict zones with limited access to medical support.
- Realistic Scenarios: Practical exercises simulate real-world challenges to prepare participants for potential threats.
- Expert Instruction: Delivered by experienced trainers with military, medical, and security backgrounds.
- Hands-On Training: Emphasis on practical skills like navigation, first aid, situational awareness, and personal security.

Core Components

- Life-saving first aid skills tailored for environments with delayed or no medical response
- Risk assessment and personal security awareness
- Trauma care (e.g., gunshot wounds, blast injuries)
- Evacuation and casualty management under fire or threat
