

## Chimero: The evolution of High Power Charging (HPC)

# Challenges for the EV charging infrastructure

## HPC Infrastructure

EV registrations grow faster than electrical infrastructure

Substantial grid connections for conventional HPCs

Currently difficult to operate fast charging infrastructure profitably

# CHIMERO

## High Power Charger & Electrical Energy Storage

Integrated battery storage

Low power supply

High power charging

Active balancing of outputs

Consumption optimization

Easy PV integration

Direct Payment option

Customizable touchscreen

Configurable cables

With the **integrated battery storage** in CHIMERO, electric cars can be **charged quickly** without straining the grid.
