# WE ARE HERE TO:

## vision

Be a reference in clean beauty in Brazil and worldwide, combining science, sustainability, and purpose in every formula.

## mission

Inspire clean beauty routines: simple, conscious, and connected to nature . Using ingredients that care for your skin and respect the Earth.

# ABOUT US

---

We are passionate about nature and all that it provides.

We chose the tropical superfruit **Soursop (Annona muricata)** for its nutritional richness and therapeutic benefits, such as **antioxidant and antimicrobial activity**.

We **upcycle** the fruit's waste to create **natural and vegan cosmetics with clean formulas**, prioritizing raw materials that respect the environment and deliver real results for all skin types.

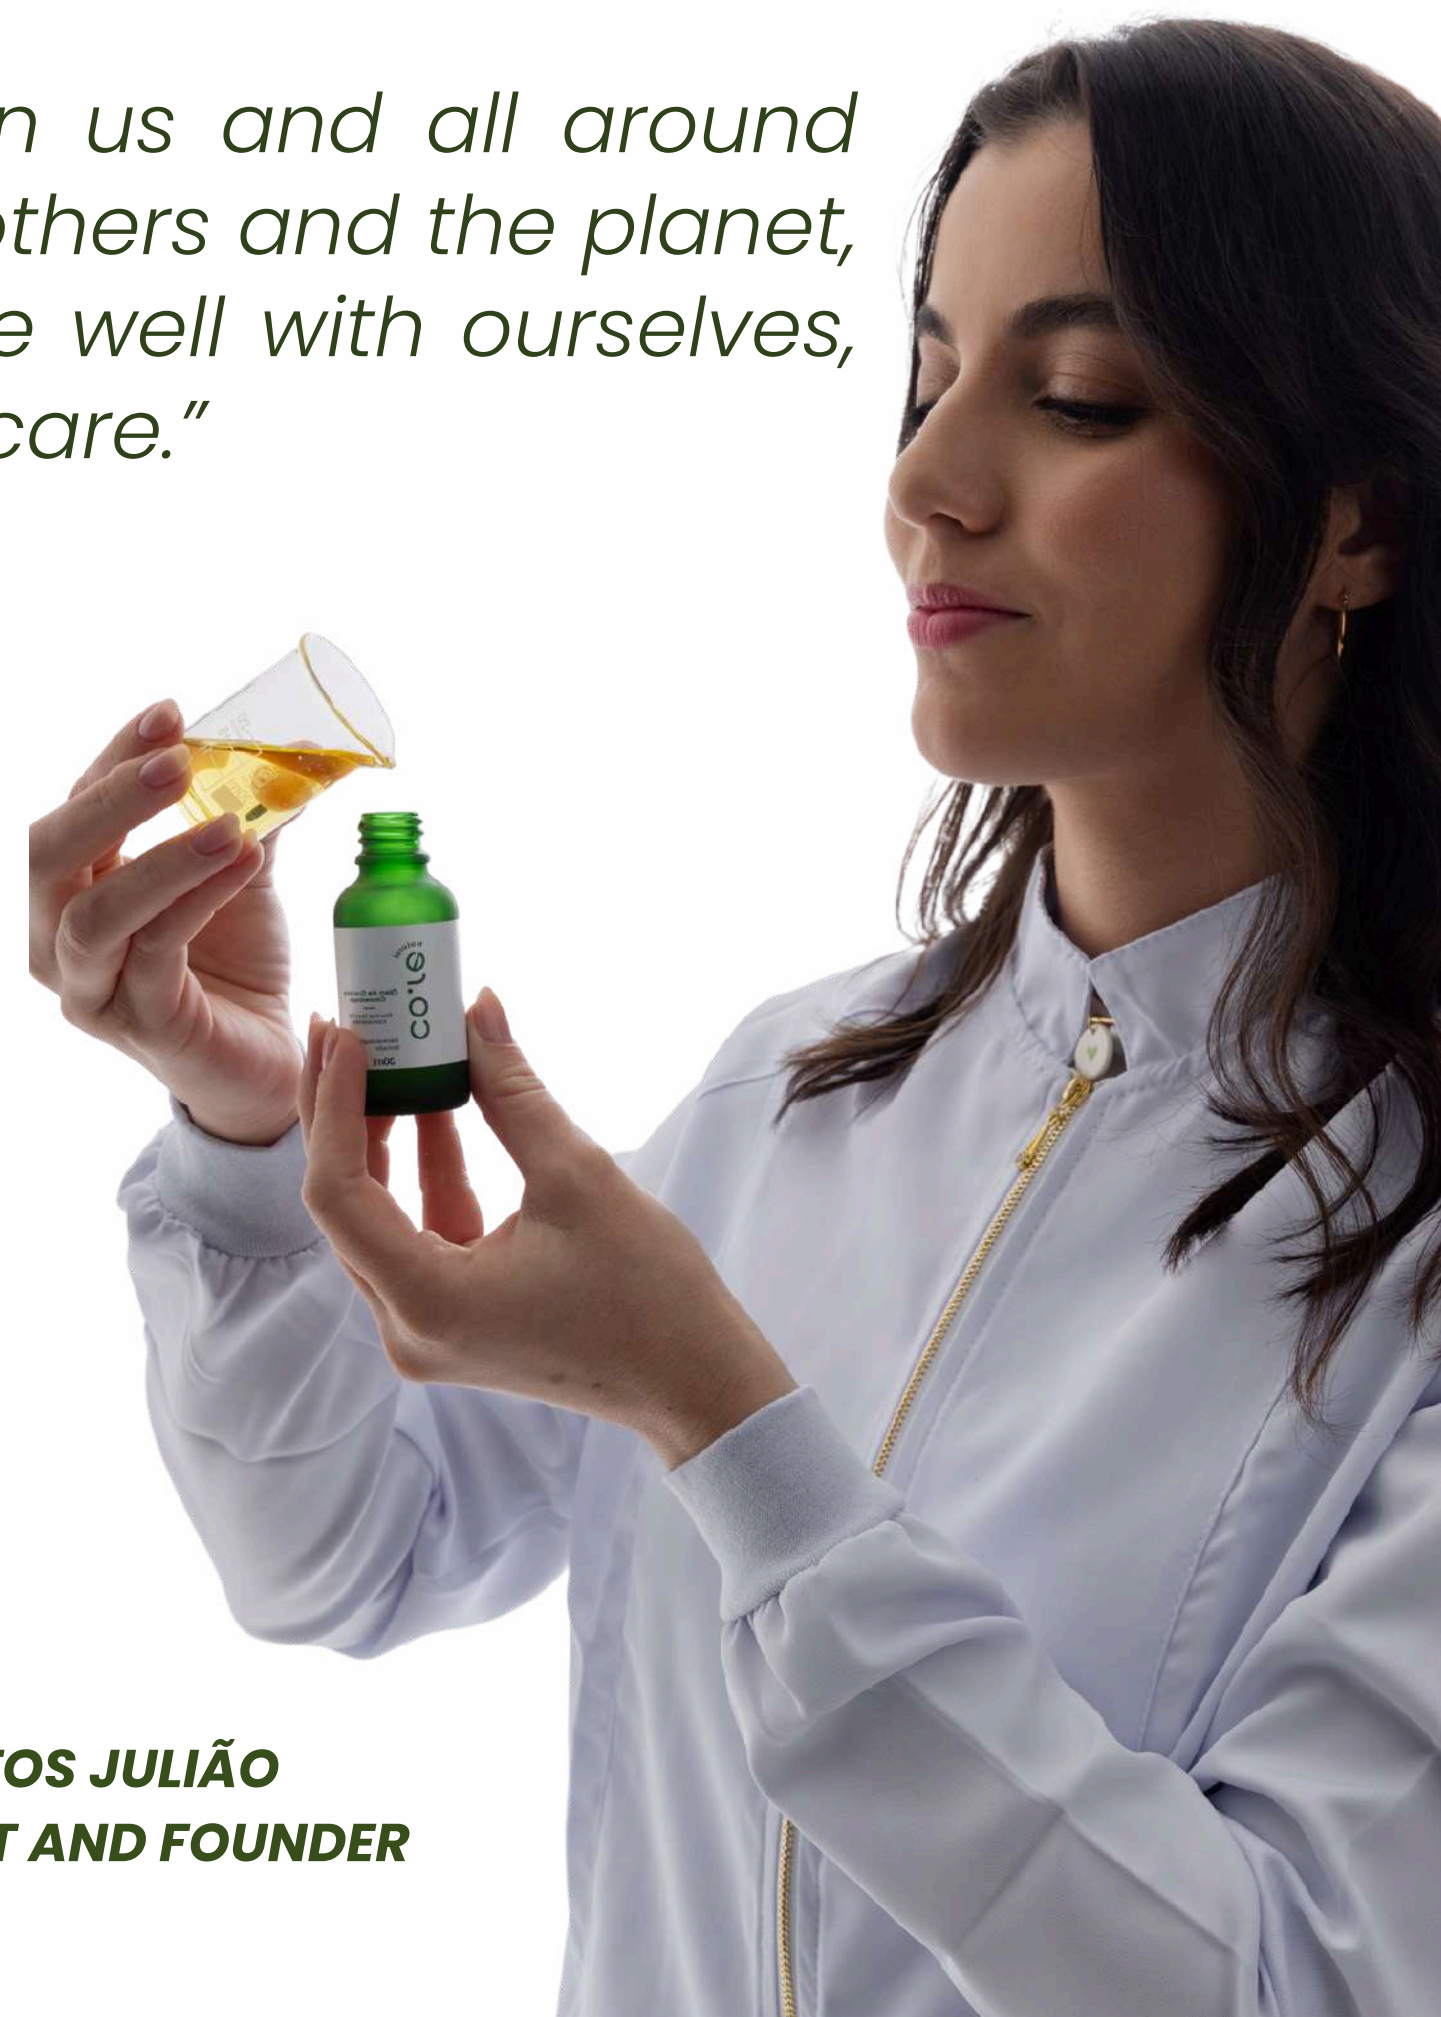

# FARM TO FACE

We harness the power of natural plant-based substances, combined with extraction technologies, to nourish and treat the skin more naturally.

Our products are designed to reduce environmental impact from the start, and we seek suppliers and partners aligned with this sustainable cause.

*"Nature is within us and all around us. To care for others and the planet, we must first be well with ourselves, prioritizing self-care."*
