

## Yealink MeetingBoard MB65/MB86

**\*DEMO PRESENTATION:** If you would like to try the Yealink MeetingBoard (and other Yealink products), please contact us and we will arrange a demo presentation. We have demo rooms in Slovenia (Ljubljana, Kranj), Croatia (Zagreb), Serbia (Belgrade), and Bosnia and Herzegovina (Sarajevo).

The Yealink MeetingBoard is the most versatile Yealink product. Terms like *video conferencing system* or *smart board* were not used intentionally because the Yealink MeetingBoard can be both and much more.

The more presentations we have with customers who have diverse needs and demands, the more we are impressed by Yealink MeetingBoard's versatility and the usage scenarios it can cover.

In essence, Yealink MeetingBoard is an all-in-one video conferencing system with a touch display, an integrated camera with AI features, and high-quality noise-cancelling microphones and speakers that runs on Android with native Microsoft Teams and Zoom Rooms, and comes in 165 cm (65") or 218 cm (86") display size.

Yealink MeetingBoard runs on Android 10 that is certified for both Microsoft Teams and Zoom Rooms. This guarantees that Yealink MeetingBoard meets the security standards needed for professional usage (MS Teams/Zoom-certified and MS Teams/Zoom-compatible are two different concepts whereby only certified devices guarantee safety and allow the full usage of the MS Teams/Zoom application).

The features that make the Yealink MeetingBoard versatile include various connection options, add-ons and expansions, i.e. an extended screen, higher-performance cameras with optical zoom, additional wireless microphones, an OPS slot enabling an upgrade to the Windows operating system, a WPP30 wireless dongle for content sharing and wireless device mode, while a content camera capturing the physical board is coming, and much more.

The advertisement features a large Yealink MeetingBoard on a white tripod stand. The screen displays a meeting interface with a clock showing 9:35 AM, a 'Town Hall' title, and a list of participants including 'Jury 100M', 'Jury 200M', 'Jury 300M', and 'Jury 400M'. The background is a light blue gradient with abstract shapes.

### Fantastic Meetings on Board

Yealink MeetingBoard,  
A Collaboration Display

-  Integrated Intuitive Whiteboard
-  Premium AI Audio and Video
-  Full Device Ecosystem
-  Fit to All Rooms

## SUITABLE FOR DIFFERENT ROOM SIZES

Do you have a small meeting room or CEO office? The MB65 MeetingBoard will cover all your needs. In case of a larger meeting room you can choose the bigger MB86 display, additional PTZ cameras with 6x or 12x optical zoom, additional wireless microphones to cover all the participants and the extended-screen option that allows you to combine two screens: one for presentation sharing, and another one for online meeting attendees.

## BOTH A PROFESSIONAL CONFERENCING SYSTEM AND AN ENTERTAINMENT DEVICE

The Yealink MeetingBoard can easily be transformed into a normal TV set, a smart TV or simply a large tablet. HDMI and wireless sharing allow you to plug in a TV box, Chromecast etc. or just share your content wirelessly from a compatible PC or smartphone. If you want a professional video conferencing system and an entertainment device at the same time, MeetingBoard equipped with the options above is the perfect solution.

## COVERING ALL THE COLLABORATION OPTIONS: MS TEAMS, ZOOM, GOOGLE MEET, CISCO WEBEX

The Yealink MeetingBoard is a native MS Teams and Zoom Rooms device but can also be expanded to cover all the most popular collaboration solutions. The Yealink MeetingBoard can be upgraded with the OPS expansion slot and by adding both, the Windows OPS module and Mago Room software, allowing you to have online meetings in MS Teams, Zoom, Google Meet or Cisco Webex. Additionally, by adding Mago Room software you can use Mago Room solutions, e.g. the Whiteboard.

## A VISUALLY ELEGANT PRODUCT THAT WILL IMPRESS YOUR PARTNERS

One of Yealink's key principles is *as little wires as possible*. Yealink is really focused on ensuring that all solutions look clean and elegant. The Yealink MeetingBoard has an award-winning industrial design, and everything is seamlessly integrated. If you need additional microphones, they are wireless and designed in the same style as the Yealink MeetingBoard. The improved camera has a dedicated slot and looks impressive as it follows the speaker during a presentation, while OPC and other slots are hidden on the back side, so they do not break the design. Additionally, on top are LED bars that notify you on the status of the Yealink MeetingBoard or show on what the extension 6x/12x camera focuses during the video call.

## MEETING ROOM AND CLASSROOM

The Yealink MeetingBoard, by itself, is already a great tool to use in education scenarios. It comes with 4 pens that are designed to simulate the feeling of writing on real paper rather than on a glass surface. In case you prefer to use physical erase boards, you can connect the content camera to the Yealink MeetingBoard and share the content written on the physical board with online participants. The Yealink content camera comes with a wall stand that you place above the physical board. As you write, the software tracks your writing through the camera and sends it to the online class. The special function of this software is that it recognises the writing and, in case you step in front of the board to write something new, positions the text over you, so you don't cover it up.

Maybe a bit hard to imagine, but impressive when you see it in action. So, if you are interested in trying out the Yealink MeetingBoard, don't hesitate to contact us.

## SECURITY

Our customers range from small businesses to banks, government institutions, multinational companies etc. What they all have in common is that they want a professional high-level solution that provides the best user experience and the highest level of security, as proven by international certificates.

Yealink complies with the current EU data protection regulations and has completed an independent GDPR-compliance assessment performed by TÜV Rheinland.

ISO/IEC 27001 is the most widely recognized worldwide standard for information security management systems, and its accreditation certifies that Yealink has implemented best-practice information security processes. Yealink is also ISO/IEC 20000-1:2018 certified.

Yealink Device Management Platform is based on Microsoft Azure, which provides a robust infrastructure that is designed to safeguard sensitive data.
