

SYMONE, THE HYDROGEN COACH WITH A UNIQUE EXTRA

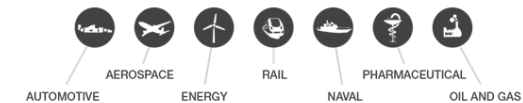

A strong partnership

Symone, the French hydrogen coach with a unique extra that wants to revolutionize the motorway, is developed with Segula Technologies

- Symone is a French startup planning to decarbonize highways while improving passenger comfort and safety with a world-unique articulated coach powered by green hydrogen.

- SEGULA Technologies, a global engineering group

INNOVATION AT THE HEART OF THE GROUP'S STRATEGY

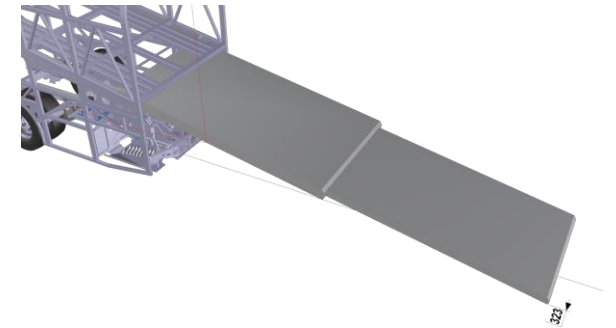

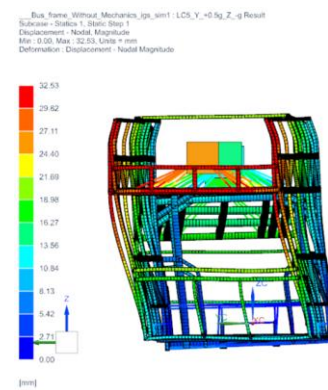

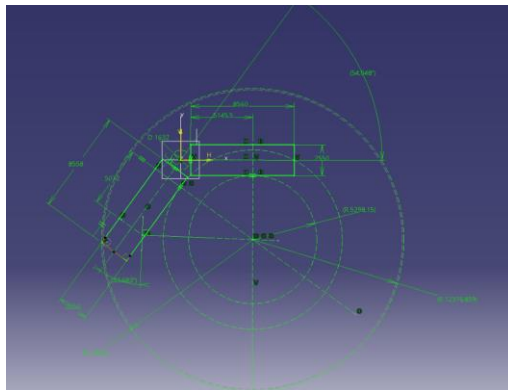

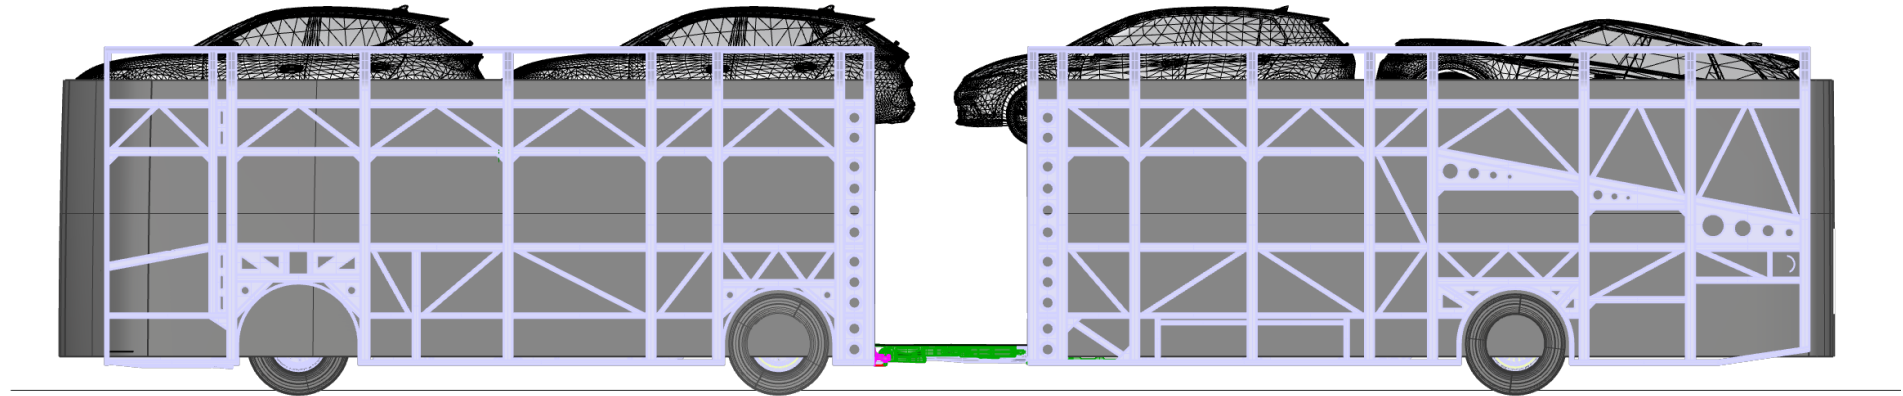

The Vision

Sustainable travelling in highest comfort without any relinquishment

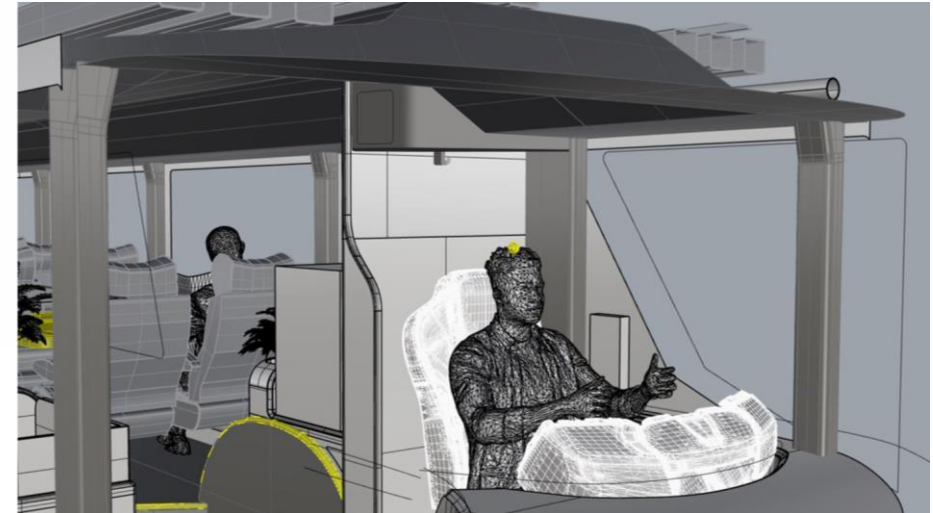

The Basic Concept

The priority in the concept phase was to assess the basic idea about its feasibility

The Concept Development

A true comprehensive development, as the tasks also include a new service mode definition

The Conclusion

Segula is very proud to have been chosen to support this challenging project

Symone, ce bus qui pourrait révolutionner notre manière de circuler sur l'autoroute
