

## Pillar 2

### Session 2.1 Risk governance and management of innovation

## Daan Schuurbiers

**Director**

**De Proeffabriek**

Daan Schuurbiers has encouraged early reflection on the social impacts of emerging technologies throughout his research and advisory work. He is currently director of De Proeffabriek, a consultancy for responsible innovation in the Netherlands. Daan works with researchers, policy makers, industry and civil society to put social value creation at the heart of technological development, with a specific focus on nano- and biotechnologies. He facilitates inter- and transdisciplinary collaborations, advises on research policy, conducts research on the societal dimensions of emerging technologies, provides education and training for researchers, and is a regular workshop moderator and speaker at conferences. Daan studied chemistry and philosophy at the University of Amsterdam and holds a PhD in the ethics of technology from Delft University of Technology. He is a member of the Horizon 2020 Advisory Group for Nanotechnologies, Advanced Materials, Biotechnology and Advanced Manufacturing and Processing (NMBP) and Chairman of the Advisory Board of the NUCLEUS project, implementing Responsible Research and Innovation in European universities.
