

Pillar 1

Session 1.5 Efficient manufacturing and automation

Jesús Pablo González

Project Manager

Eurecat

Mr. Jesús Pablo González is the Robotics and Automation Public Programme Manager at Fundació Eurecat. He holds a MSc in Telecommunications Engineering by the Technical University of Catalonia (UPC) and accumulates more than 10 years of innovation projects management. Mr.

González acquired experience in system design and validation for the space sector and hold business development positions during his professional career. Currently, he is actively contributing to the European Robotics and AI research community and represents Eurecat at euRobotics AISBL for the definition of the European R&D strategy on that field.
