

Pillar 1

Session 1.1 Green growth and circular economy

Valentina Marino

Research, development and innovation

VIMARK srl

Consultant for research and innovation, she holds a Doctoral degree in Technological Innovation for the Built Environment from Politecnico di Torino, with specialization in Energy Efficiency and retrofitting of existing buildings. She has an established background in large European cooperation projects, working as project manager in charge of research and technical work-packages. At VIMARK srl, an Italian SME with more than 35 years of experience in pre-mixed powder based materials for building construction, she is supporting the innovation of products and components and she is currently project manager assistant in Wall-ACE project (H2020, ends 2019), aimed at developing innovative, aerogel-based products for improving energy efficiency of the building envelope. She is collaborating with Green Building Council Italia, a national no profit organization for the sustainable transformation of the building market, where she is involved in European and national projects and she is Member of the Policy Task Force of the Europe Regional Networks of World GBC. She is research fellow at Department of Architecture and Design of Politecnico di Torino where she is supporting applied research to reach the market.
