

Pillar 1

Session 1.2 Sustainable and efficient energy

Veronika Wilk

Scientist

Center for Energy Sustainable Thermal Energy Systems

Veronika Wilk has joined AIT in 2014, and has been since then involved in R&D projects focusing on increasing industrial energy efficiency and use of innovative renewable energy technologies. Veronika is the scientific coordinator of the H2020 project DryFiciency, where novel heat pump systems are demonstrated in three industrial drying processes. She is a specialist in carrying out thorough process analysis and monitoring the operation of renewable energy systems. Veronika holds a master degree in chemical engineering and a PhD from Vienna University of Technology.
