

Pillar 2

Session 2.2. Medical technologies

Anneliese Pönninger

Business Development Manager

EV Group

Anneliese Poenninger is a business development manager at EV Group and responsible for cooperative and funded R&D projects acquisition. The focal areas are micro- and nano-manufacturing technologies for electronics and photonics devices for various markets, amongst them consumer, industrial, automotive and bio-medical applications. Anneliese has triggered EVG's involvement in over 30 European and national proposals, more than ten of which have been successful. She holds a Master degree in applied physics from the University of Technology, Vienna and has more than 20 years of professional experience in engineering and materials science both in industry and research establishments. She has extensive experience in the management of cooperative research projects, in technology transfer and exploitation management.
