

Pillar 1

Session 1.3 Environment and decarbonisation

Anne Chloé Devic

Innovation Manager

European Chemical Industry Council

Anne Chloe Devic got a Master's degree in Chemistry and Chemical engineering specialising in Polymers from the ENSCM (Ecole Nationale Supérieure de Chimie in Montpellier, France). She is currently Innovation manager in the Cefic association in Brussels (since 2016), specifically coordinating the materials topic for the Sustainable Chemistry Technology platform SusChem and its 17 national technology platforms.

Before joining Cefic she joined the Repsol group in 2002 in the technology center of Madrid in Spain as a senior technology advisor in Research & Innovation in materials (polyurethanes and polyolefins).

She originally started with different positions at ICI (Imperial Chemical Industries): first in the UK, then in ICI France as a pilot plant manager on a production site of surfactants, still in ICI France as a deputy site manager of a production site of PMMA cast sheets. In 1997 she took the position of team leader of scale-up activities for their Polyurethane business (which then became Huntsman), based in Brussels.
