

Pillar 2

Session 2.7. Biotechnologies and biomaterials

Adolfo Benedito Borrás

Synthesis Dpt.

AIMPLAS

Dr. Adolfo Benedito-Borrás (M), PhD degree in Chemistry by the University of Valencia, focusing on ABS copolymer degradation and recycling capabilities. Since Mars 2001, he has been working at AIMPLAS as head of the Compounding department until 2009, and until 2017 as Head of the Materials Research Department. He has been the main technical responsible of several EU-research and national projects, as well as author and co-author of several papers, patents and book chapters focused on nanotechnology applied to polymeric materials. During 6 months he was collaborating in PPI (Polymer Processing Institute) at New Jersey (USA) with the professors Xanthos and Ming-Wan Young.
