

Pillar 1

Session 1.2 Sustainable and efficient energy

Thierry Collard

R&I External Affairs Manager France, Belgium & EC Solvay

Thierry Collard is Civil Chemical Engineer of the Université de Louvain (B) and is currently R&I External Affairs Manager at Solvay. He is 59 years old. He started his career as a research engineer in the paints and coatings industry, and has been working for the Solvay company for 18 years, in diverse functions related to sales, marketing and innovation. Finding the right partners for the best projects, identifying growth opportunities for the Solvay's strategic topics are the main missions of his current function dedicated to open innovation. As R&I External Affairs Manager, he is also involved into the Batteries Alliance gathering the SOLVAY group and other top European companies. He is member of the board of EMIRI (Energy Materials Industrial Research Initiative), an industry-driven association which represents more than 60 European organizations active in the field of materials for clean energy and clean mobility technologies. Furthermore, he is also representing the Solvay group in the Belgian clusters CATALISTI and GREENWIN, dedicated to sustainable chemistry, clean energy and circular economy. He is also Board member of the Belgian Industrial Research and Development association (BIR&D), whose mission is to stimulate and improve the attractiveness of R&D activities in Belgium.
