

## Pillar 2

### Session 2.4 Skills needs

## Ineke Malsch

### Trainer

### NANO2ALL project

I advise and write about responsible development of emerging technologies in their societal context emphasizing ethical aspects. I have graduated in physics (Utrecht University, 1991) and hold a PhD in philosophy (Radboud University, Nijmegen, 2011). I have been involved in EU funded projects on responsible development of nanotechnology, converging technologies and synthetic biology since 2002, and am currently engaged in the Nano2all project [www.nano2all.eu](http://www.nano2all.eu). In this project, I am responsible for training citizens and stakeholders participating in dialogue about responsible research and innovation in nanotechnology. I have published articles and contributed to books for a variety of audiences including scientists, professionals and lay persons about education for ethical and responsible development of nanotechnology and other emerging technologies. Last publication:

- Ineke Malsch, “Future Technologies We Want”, Wolf Legal Publishers, April 2018. <https://www.bol.com/nl/p/future-technologies-we-want/9200000090384460/>
