

1st Forum on the EIC Horizon Prize on Innovative Batteries  
for eVehicles – 31 October 2018 - Vienna

## Tobias Placke

Head of Division “Materials”

University of Münster, MEET Battery Research Center

Dr. Tobias Placke is head of the division “Materials” at the MEET Battery Research Center (University of Münster) in Münster, Germany. In this division, a group of about 20 PhD students and PostDocs works on the synthesis, optimization and characterization of advanced anode and cathode active materials as well as inactive components for the next generation of lithium ion batteries (LIBs). Besides LIBs, the group also focusses on the development of alternative advanced battery storage technologies. Tobias Placke studied chemistry at the University of Münster and received his diploma in the group of Prof. Martin Winter in the field of physical chemistry in 2010. He finished his doctorate (Dr. rer. nat.) at MEET in 2014 and focused on the development and characterization of graphite-based anode materials for LIBs in his PhD work.
