

1st Forum on the EIC Horizon Prize on Innovative Batteries for eVehicles – 31 October 2018 - Vienna

Jordi Aibar

CTO

Earthdas and Magnetika

Jordi Aibar is a passionate Telecommunications engineer who has developed its professional in two main segments: software development and racecar engineering. Holding a MSc on Telecommunication and a Master on Race Engineering and after being involved in the design of an electric go kart, joined forces with the serial entrepreneur Rafael Terradas to create a solution for personal mobility. Currently holds the position of CTO on two companies related to this area, Earthdas and Magnetika. Earthdas is focused on the creation of graphene based batteries with patent licenses on this area and Magnetika is working on wireless energy transfer based on a patented technology. Earthdas already had some laboratory results based on cell testing and now is working on scaling the technology to bigger sizes.
