JET TWIN BATCH BREWER

JET TWIN 1000855US

VENTILATION REQUIREMENTS

- Back: 70mm/2.7"
- Sides: 50mm/1.9"

Clearance required around machine if installed in an enclosed cabinet.

ELECTRICAL INSTALLATION PROCEDURE

When installing the machine, always observe the local regulations and standards. The appliance is supplied with a NEMA L6-30P power cord. A suitable mains power supply socket should be available within easy access of the appliance so that it can be disconnected easily after install.

PLUMBING INSTALLATION PROCEDURE

- Ensure that the equipment is installed according to local plumbing & water regulations.
- Mains water pressure required (limits): 8 -145psi (55 -1000kPa, 0.05 - 1MPa).
- The inlet water must be potable and free of contaminants.
- Requires inline water filter within your water specifications.
- The machine is supplied with a 3/8" Compression or 3/8" John Guest.
- Turn on the water to flush any impurities, dust etc from the inlet hose and water pipe. Allow several litres through, Especially for new installations.
- Connect the hose to the inlet valve of the machine. Make sure a sealing washer is fitted.
- Turn on water and check for leaks.

OPERATING THE APPLIANCE FOR THE FIRST TIME

- Check that all installation procedures have been carried out.
- Ensure water valve is on. Plug machine into an appropriate electrical supply and switch on the rocker switch under the machine. Follow the instructions on the screen.
