CHARCOAL TECHNOLOGY BY JOSPER

RADIATION, CONVECTION AND CONDUCTION

Three heating sources for broiling that guarantee the best results.

Josper is the only closed grill on the market that, thanks to its design, robustness, technology and tradition, will allow you to **enjoy the best charcoal cooking in your own home.**

CUSTOM DESIGN

Every home is a special world and individual needs vary, which is why Josper adapts to every space, making every home and every kitchen special, different and unique. We are committed to accompanying you throughout the entire process.

CHARCOAL OVEN JOSPER CASA

Create your own **Josper** space in your garden or terrace.

Josper is an elegant combination of a grill and an oven in one machine. It works entirely with charcoal.

It has a unique closed barbecue design:

- Different broiling levels.
- Agile and robust.
- Easy to operate, with a front door system.
- Temperature control by a vent system.
- It works entirely with charcoal, aromatic chips and in combination with firewood.
- Double grill for increased performance.

With the added value that charcoal gives off to the food, we can achieve those traditional flavours, as well as perfect texture and juiciness.

By combining the grill and oven function, we can work with controlled temperatures, sealing the product, smoking and broiling at the same time. **Providing unique results, making the Josper Charcoal Oven a unique machine as well.**

Perfect for preparing dishes like roasts, meat, large pieces, pizzas, seafood, vegetables, etc.

After 50 years of experience in the demanding hotel and catering industry, t**he Josper CASA is reaching out to the residential market with the aim of bringing professional gastronomic charcoal cooking to the home**; achieving the best flavours, aromas and textures provided by the unique taste of charcoal.

Josper CASA offers different configurations for better integration in different spaces and barbecue areas.
