

PROFILE STRIP GRAND

24V, 3m, 2700K

PROFILE STRIP GRAND is a flexible LED strip that is 3 m in length for connecting to a 24V DC voltage power supply. The rear side is fitted with adhesive tape to make for simple installation. The strip is also available in three light colours. To obtain consistent light output over long lengths, the strips should be powered at both ends from a length of 1.5m. For lengths in excess of 3 m, a new feed-in must be made. To ensure that heat is dissipated, the LED strip must be stuck to an aluminium profile.
