- 26 W / 1.700 lm
- 230V
- · Outer globe powder painted aluminium
- Inner globe shock proof acrylDimmable
- ø 350 mm
- Height 170 mm or 205 mm

GERBERA ceiling lamps are available in two sizes and in two colours, pearl white and dark graphite grey. The diameter options are 350 and 450 mm. Ceilings lamps are available with or without an uplight element. The uplight element reflects indirect light beautifully through the ceiling surface.

GERBERA

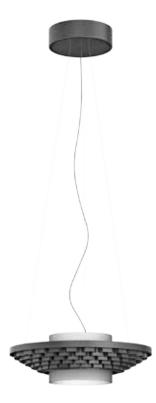

GERBERA 450 Dark graphite grey Code 1589051

- 47 W / 2.000 lm
- 230V
- Outer globe powder painted aluminium
- Inner globe shock proof acryl
- Dimmable
- ø 450 mm

- 39 W / 1.700 lm
- 230V
- Outer globe powder painted aluminium
- Inner globe shock proof acryl
- Dimmable
- ø 350 mm

GERBERA pendant lights are available in two sizes and in two colours, pearl white and dark graphite grey. The diameter options are 350 and 450 mm. The length of the hanging wires and cables is 2.500 mm, which enables the installation in a high space (maximum room height 4 m). Pendant lights include an uplight element which reflects indirect light beautifully through the ceiling surface.

GERBERA

GERBERA 350 Dark graphite grey Code 1589061

- 17 W / 760 lm230V
- Outer globe powder painted aluminium
- Inner globe shock proof acryl
- Dimmable
- Width 350 mm
- Height 180 mm

GERBERA wall sconce is a half-round wall lamp, width 350 mm. The colour options are pearl white and dark graphite grey. The wall sconce includes an uplight and downlight element.

ILLUSIA

ILLUSIA Code 1589020 Dark graphite grey

The inspiration for the Illusia ceiling light came from the desire to create an atmospheric table setting without any candles. The secret of the light is the glass ball, hidden inside the globe. Its patterned surface creates a floral reflection on the table. The glass balls are handcrafted by glass blowers at the Riihimäki glass works, to make each flower unique.

- 26 + 1 W / 1700 lm
- 230 V, not dimmable
- Shade made of powder painted aluminium
- Inner globe made of shock proof acryl
- Hanging tube, length 850 mm
- Adjustable suspension cord, maximum room height 4 m
- ø 500 mm x H 300 mm

The shade of the luminaire is made of powder painted aluminium and the colour options are dark graphite grey and white. The inner globe is made of shock proof acryl. The diameter of the luminaire is 500 mm and height 300 mm. The length of the hanging tube is 850 mm, with an adjustable suspension cord. The maximum room height is 4 m.

The luminaire is well suited to be hung above the table of a living or dining room. You can "set the table" with the reflected pattern of the light. The hanging switch is a beautiful detail with a double function. You can switch on the main light when the light illuminates the whole room, or you can only switch on the reflected pattern for the atmosphere, or both at the same time.

EGGO

EGGO, white Code 1589022

- 230V / 350 mA / 3 W
 Power supply IP20 included
 Size approx. L250 x W160 x H170 mm

EGGO is a table light, made of free-blown glass. The free-blowing technique gives each glass an individual size and shape and, therefore, the above sizes are approximate. The smaller glass stone works as the weight of the wire and also as the switch and dimmer of the light.

Design: Camilla Moberg

CUBE

ARCTIC SKY

ARCTIC SKY white Code 1589031

- IP44
- 230V / 3 W / 700 mA
- Power supply IP20 included
 Size 500 x 500 x 30 mm

ARCTIC SKY RGBW Code 1589032

- 230V / 5 W / 350 mA
- Power supply IP20 included, which allows the connection of max 5 panels
- Size 500 x 500 x 30 mm

ARCTIC SKY RGBW (without power supply) Code 1589035

- 5 W / 350 mA
 Size 500 x 500 x 30 mm

ARCTIC SKY is a modular light element with decorative lighting effect. The illuminaire is made of Arctic Crystal crushed glass which creates crystal-like sparkling in the light. The integrated optic fibres inside the element illuminate the whole surface of the light. The light source is a white Led or a colour changing RGBW Led.

Design: Solulight

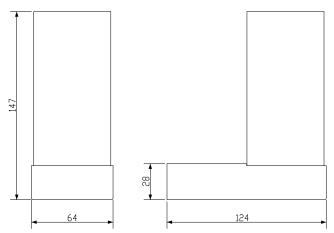

TOIVE

TOIVE Code 1527844 TOIVE 1150 mm • Code 1527848 TOIVE 1650 mm • Code 1527849

- 2 x 1 W350 mA
- Stainless steel frame

- Lead-free crystal
 Power supply included
 Surface mounted acrylic panel 1150/1650 x 200 mm

Toive is a modern and decorative crystal light fitting. The light reflects through the crystals and creates beautiful and exciting figures on the wall. The colour of the downlight is warm white. Toive is available also with surface mounted acrylic panel. Toive is well suited for private and public premises, in lounges, hallways or e.g. in a bedroom above the bedside tables.

Code 1532363 Connection wire 100 mm

IP44

Code 1532361 Adjustment fittings, a pair

HUUHTO EASY lights are suitable for a diverse use. They are ideal for kitchen unit lighting and they can be used also for indirect lighting through ceiling surface.

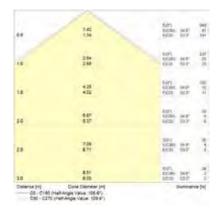

Huuhto profile lights are well suited for many purposes. They can be used in the edge of a table to illuminate the front surface of drawers and cupboards. In these installations Huuhto provides an excellent light inside the drawers when opening them.

HUUHTO EASY

- Broad spread of light, suitable e.g. for illumination of kitchen units, shelves and ceiling and wall surfaces
- To be noted in installation planning that the connector of the supply cable will add the total length with 20-40 mm
- Easy to install with the enclosed clips
- Profile size: width 18 mm, height 16 mm
- The total length of connected profiles is max 7 m

HUUHTO EASY is quick and easy to install. The profiles are connected to each other with enclosed connectors. The profiles are fastened invisibly on the installation surface with enclosed clips. The satin cover reduces the Led spot effect to minimum. The cover is mounted inside the profile edges, preventing the side glare of light.

Code 1532118 Supply cable 5 m

Code 1532288 Power supply 75W

Huuhto profile lights can be used for indirect lighting through ceiling surface.

Huuhto profile lights are delivered to order also for outdoor use and for moist premises with white light or colour changing RGB. The recommended length of one Huuhto light profile is maximum 2 meters.

SAUNA LIGHTING SETS

Cariitti sauna lighting systems are the most comprehensive and advanced solutions on the illumination as well as fibre optic sets with various effects. We also have a wide range of Sunlimited - use your imagination. In addition to standard sauna sets we produce individue

ne market. Our product range includes standard sets for Sauna seat and ceiling auna fibre optic fittings. With Cariitti fibre optic illumination the possibilities are all solutions and lengths to order.

Glass fibre Sauna Seat Sets enable you to create illumination even in existing saunas. In addition to standard seat sets, individual solutions can be designed by freely combining fibres, projectors and lighting fittings. All sauna lighting fittings can be installed to fibres with a crimpable ferrule (1538020, page 60) which comes with the fitting.

SEAT SETS

Glass fibre Sauna Lighting Sets can be installed in the sauna benches or ceiling (temperature not exceeding 180°C). In addition to standard lighting sets, individual solutions can be designed by freely combining fibres, projectors and lighting fittings. Led projectors ensure a low energy consumption and a very long lifetime. They are completely silent and produce just a small amount of heat. A high Ra index >90 together with a warm 3000 K Led ensures an atmospheric sauna lighting.

ARCTIC CLOUD

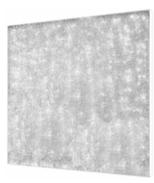

ARCTIC CLOUD Code 1589038

Ceiling light panel, made of crushed glass, size $300 \times 300 \times 25$ mm. Depending on the chosen projector you can create effects like fire flame, northern lights or colour change. With clear white light the panel looks like crushed ice.

1 x S-Flex 4 M8

ARCTIC SKY

ARCTIC SKY Code 1589030

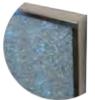

Crushed glass panel $500 \times 500 \times 30$ mm, like a painting. To be illuminated with one 6 mm fibre, installed in the middle back side of the panel. Can be installed on a sauna wall. A dashing and therapeutic element that changes character according to the chosen light effect.

Depending on the chosen projector you can create effects like fire flame, northern lights or colour change. With clear white light the panel looks like crushed ice.

1 x S-Flex 6 M8

FANTASIA

FANTASIA Code 1589017

Crushed glass panel $1000 \times 500 \times 35$ mm is like a painting. Fantasia is illuminated with two 6 mm fibres and it can be installed in a sauna behind an electric heater. A dashing and therapeutic element that changes character according to the chosen light effect.

Depending on the chosen projector you can create effects like fire flame, northern lights or colour change. With clear white light Fantasia looks like crushed ice.

2 x S-Flex 6 M8

Fittings are easy to install. Colours gold, chrome and white. Installation surface min. 6 mm. At the end of a fibre, the light angle is approx. 40-60°. With a lens fitting, the light can be focused in a 25-35° angle depending on the lens.

S-PAVER 3300 Kit 4 Code 1545176 S-PAVER 3300 Kit 6 Code 1545177

The Kits include 4 or 6 pcs of S-Paver lights, each equipped with a 5 m connection cable, and a connection box with a power supply and serial connection module.

NB! All S-Paver fittings are delivered with both clear and satin glass.

S-PAVER RGBW KIT

S-PAVER RGBW 3200 Kit 5 Code 1545198

S-PAVER RGBW 3300 Kit 5 Code 1545178

The Kits include 5 pcs of S-Paver lights, each equipped with a 5 m connection cable, and a connection box with a power supply.

NB! All S-Paver fittings are delivered with both clear and satin glass.

NB! Serial connection only. Each light equipped with a 5 m connection cable.

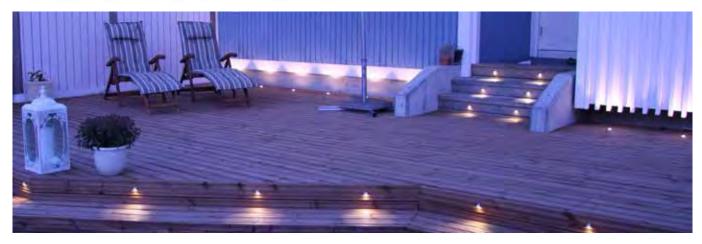

GP-65 KIT 6 IP67

GP-65 KIT 6 IP67 Code 1545193

The Kit includes 6 pcs of GP-65 Led lights with 5 m connection cables and a connection box with a power supply and serial connection module.

- 6 x 1 W/350 mADirects light downwards and is ideal for terraces and steam rooms

TERRACE LIGHT KIT

TERRACE LIGHT KIT Code 1553041

The Kit includes 3 pcs of S-Paver lights with 5 m connection cables and a connection box with a power supply and serial connection module.

- 3 x 1 W/350 mA
 The fittings are delivered with both clear and satin glass.
- Max 6 pcs of lights can be connected to the Kit

ADDITIONAL LIGHT S-PAVER 3300 ALUMINIUM Code 1553040

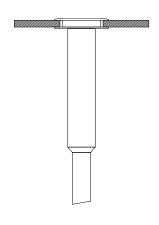

APOLLO BOLLARD

Apollo is a stylish outdoor luminaire. Apollo has a light source 6 x 1 W Led. The pole is made of galvanized and powder coated steel.

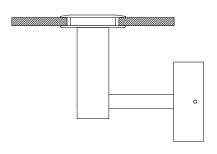

APOLLO BOLLARD Code 1554504

- 6W/350 mA
- IP44
- Power supply is included Luminaire height 1150 mm
- Luminaire diameter Ø 250 mm

PROJECTORS

Among our range of projectors you will easily find a model to suit your own lighting solutions and type of installation.

All our projectors are equipped with an Led light source. This ensures excellent light quality and long lifetime. The product range includes also RGBW projectors with colour change, as well as projectors with various effects.

The projector VPL30C BT is equipped with wireless Bluetooth control option. The application can be loaded from AppStore for iPhone and iPad, and from GooglePlay for Android. With the application you can control the colours and brightness of your projector, create individual colour change programs or choose a readymade program.

OPTIC FIBRES

With optic fibres light can be taken everywhere. There is no electricity or heat in the fibres, there is only light. When producing a fibre bundle the projector end is hermetically sealed to keep the fibre clean and later prevent it from melting. The projector end is protected with a thermal protection filter. All fibre joints and endings in the fibre bundle are made without adhesives using the so-called dry polishing method which gives the best light conductivity performance on the market.

FIBRE HARNESS CALCULATOR

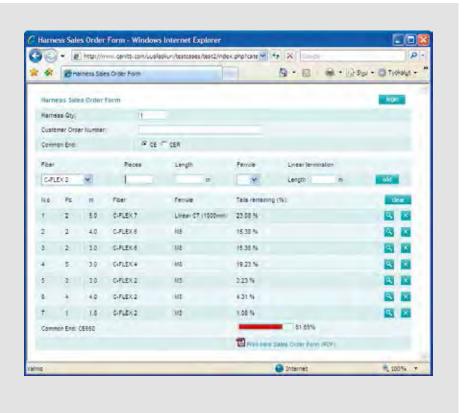

With the fibre harness calculator you can calculate or create your own fibre bundle. The price will be calculated only if you have a password. Passwords are available for our dealers.

HOW TO USE THE PROGRAM

- Specify your order with a number or mark
- 2. Choose CE/CER common end. CE=ordinary CER= randomized
- 3. Choose the fibre size
- 4. Define the amount and lengths of the fibres, and choose the type of ferrules.
- If Linear end fitting is chosen, define the length. If you chose another end fitting move directly to add.
- 6. Press the add handle and your selection becomes an order line.
- 7. Repeat item 3-6 until your chosen bundle is calculated.
- 8. Press the "print order form" handle and you will get a complete calculation in pdf format.
- 9. Save the pdf file on your own computer and send it as an attachment of an e-mail to us.

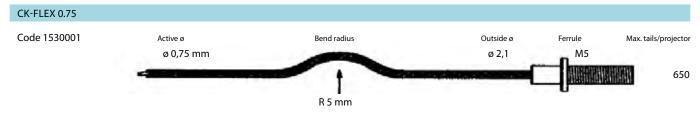

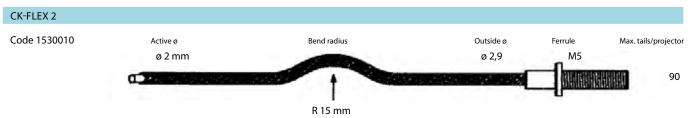

BARE PLASTIC SINGLE CORE FIBRES

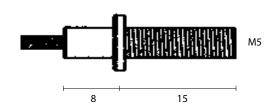

TYPE	CODE	ACTIVE Ø mm	OUTSIDE Ø mm	BEND RADIUS mm	FERRULE	MAX TAILS/PROJECTOR
CK 0.75	1530016	0.75	0.75	5	-	650
CK 1.0	1530017	1.0	1.0	7.5	-	390

PLASTIC SINGLE CORE FIBRES WITH BLACK OUTER TUBING

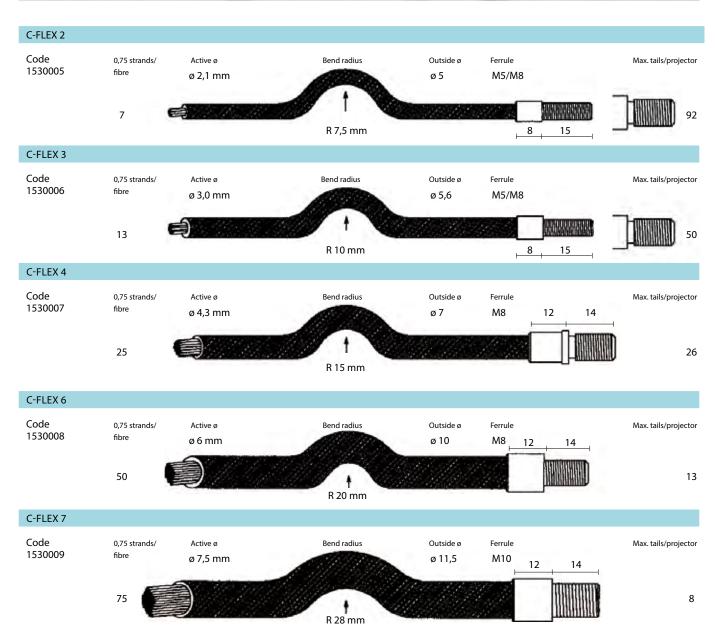

PLASTIC STRANDED FIBRES

- C-Flex plastic fibres are made of 0.75 mm strands, e.g. a 4 mm fibre consists of 25 single 0.75 mm strands.
- The light transmitting of plastic fibres is excellent, the light reduction is max 3%/m.
- The recommended ambient temperature is -40 +80 °C.
- The recommended fibre lenght is max. 10 m.

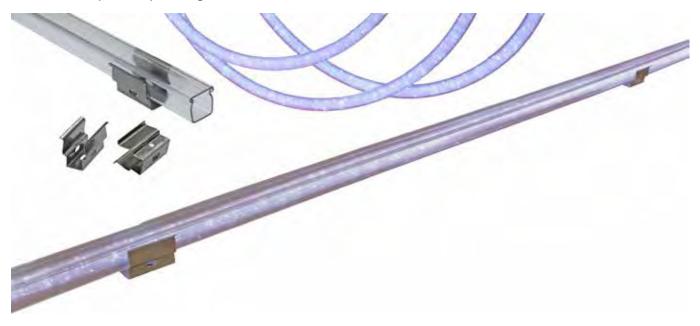

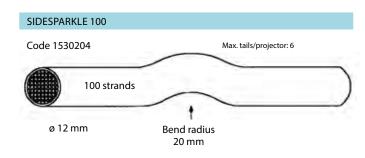

LATERAL PLASTIC FIBRES AND INSTALLATION ACCESSORIES

Lateral fibres are used to illuminate and emphasize various forms and shapes. They are commonly used in steam baths, spas and pool edges.

U-CHANNEL + COVER

Code 1555040

Ridig clear polycarbonate U-channel and cover for lateral fibre Sidesparkle 100. Length1.0 m, width 18 mm and height16 mm.

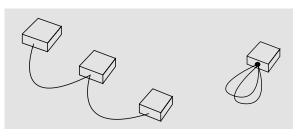

CLIP FOR U-CHANNEL

Code 1555041

Metallic clip to fasten the U-Channel for Sidesparkle 100.

MIRROR END

Code 1548428

LATERAL FIBRES AND ACCESSORIES

- Lateral fibres are usually lit from both ends, with the maximum fibre length of 30 m. Lateral fibre can also make a loop when its both ends go into the same projector. If lit from one end the maximum length is 10 m with a mirror end cup.
- The recommended ambient termperature of lateral fibres is -40 - +80 °C.

76

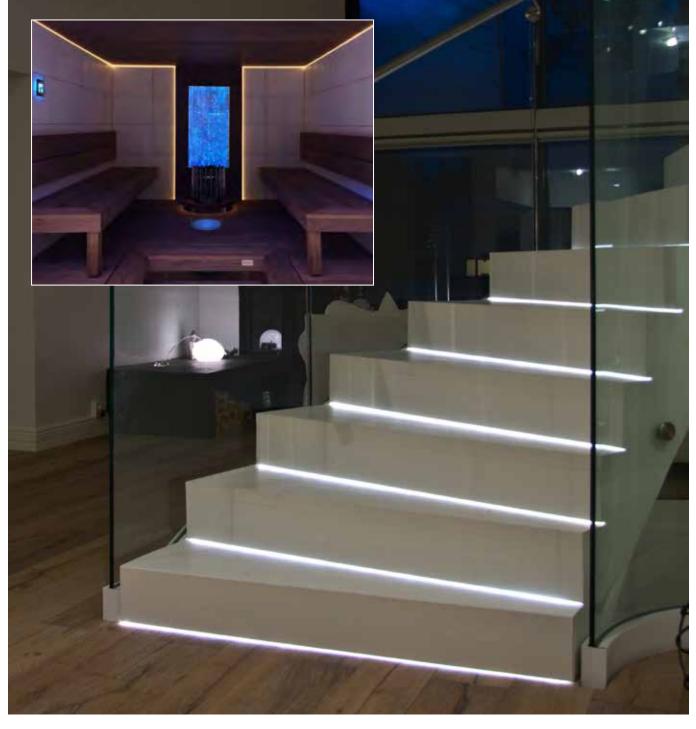

LATERAL GLASS FIBRES

SIDELIGHT – GLASS FIBRE Ø 4.85 mm

- Sidelight glass fibre can be used to create e.g. decorative lighting and effects.
 Can be illuminated also by a projector with a colour effect.
 The recommended ambient temperature of Sidelight fibres is from 40 °C to + 200 °C.
- Max 52 tails/projector.
- The recommended fibre length is max 3 m, lit from one end, or max 5 m, lit from both ends.
 The recommended projector VPL10.
 The minimum bend radius 15 mm.

GLASS FIBRES

- Glass fibres are produced from 0.05 mm glass strands. The fibre is flexible and easy to handle.
- The recommended ambient temperature of glass fibres is from 50 °C to + 180 °C.
- Glass fibres do not wear out and they can be used both indoors and outdoors.
- The light transmitting is excellent, the light reduction is max. 5%/m.
- The recommended fibre lenght is max 10 m.

Cariitti fibre optic common end represents the latest development. The common end is designed for easy assembly and efficient cooling. It is equipped with an IR-UV filter that ensures a clean fibre end and a long fibre life.

To guarantee the greatest efficiency the thermal connection method makes sure that the fibres are sealed and no light leaks between fibres. In demanding lighting environments the compatibility of the lighting levels between different cables is ensured by randomising the fibre strands at the common end in a 1:25 ratio. Different sized fibre optic cables can be fitted into the same common end.

CE - STANDARD COMMON END

CER - RANDOMIZED COMMON END

COMMON END SIZES 100, 200, 300, 450 AND 650 STRANDS.

Power supplies are delivered in ready-to-install sets, which makes the installation quick and easy. The connection is made with quick-connect fittings.

With remote controls the functions can be switched on and off and, depending on the luminaire, they allow you to control the colour change or dimming or to move from one pre-programmed lighting feature into another.

LED DRIVER SETS 350 mA MAINS DIMMABLE
