1. OVERALL DESCRIPTION

The enclosures XL3 S 160 are cabinets with a particular "all modular ready to re-use configuration".

Wide range of setups: 2 to 8 rows of 24 modules and 4 to 8 rows of 36 modules that comes with rails and mounted faceplates. Available in 2 metal versions, surface mounting cabinets and flush mounting cabinets.

- Compatible with DRX 125, DPX³, MCBs
- Height adjustment of rail position
- Large faceplate
- High capacity
- Monobloc enclosures
- Flexibility for terminals connection (neutral/ground)
- Joining one above the other

2. PRODUCT RANGES
2.1 Surface mounting configurations

Cat. No (s)	No of rows	No of modules	Total No of modules	Weight (kg)
3 372 02	2	24	48	9,374
3 372 03	3	24	72	12,02
3 372 04	4	24	96	14,626

4. GENERAL FEATURES

4.1 Technical properties

- Degree of protection : IP30 - IK07 without door
IP40 - IK09 with door
IP40 - IK08 with glass door
- Color of the cabinet : White RAL 9003
- Short-circuit Intensity Icc 17 kA
- Storage and usage temperatures: -5 °C to +40°C
- Maximum permissible current 160 A
- Uimp: 4kV
- Ue: 415v
- Ui: 500V

4.2 Materials

- Frontal panel : steel 1.2 mm thickness
- Door : steel 1.2 mm thickness
- Chassis : steel 1 mm thickness
- Adjustment bracket :
Self-extinguishing polycarbonate
reinforced with 10% glass fiber >PC-GF10 FR<
UL 94 / IEC 60695-11-10 classification
(thickness 0,8; 1,6; 3,2 mm) - ;V1 ;V2

Painting Characteristics

- Painting: epoxy polyester powder. Minimum thickness 60µ
- Grain size distribution (Ø average) ISO 8130-1: 32 µm 36÷46%; 63 µm 74÷91%
 - Scratch test UNI 9395: invisible scratch (0.4 kg)
 - Cross-cut test ISO 2409: GT0...1
 - Overheating resistance (DYI (190°C, 60') ASTM D 1925): >1,5

After 10 minutes contact, at ambient temperature, with the following substances the coating remains intact:

- methyl Alcohol
- Toluene
- Xylene
- Chloridric Acid
- Gas oil
- Gasoline
- NaOH 30% (caustic soda, aqueous solution)

After 1 week contact, at ambient temperature, with the following substances the coating remains intact:

- bleach 15% active chlorine
- saturated solution bleach
- Ethylic alcohol and N – hexane resistance as define in the standard UNI 9852.

After 1 month immersion, at ambient temperature, in the following aqueous solutions the coating remains intact:

- 1% standard detergent
- 10% sodium chloride
- 1% citric acid
- 5% phosphoric acid
- 10% ammonia
- xylene
- 20% acetic acid

After 6 months immersion, at ambient temperature, in the following aqueous solutions the coating remains intact:

distilled water

normal water

Salt spray resistance

500 hours without blistering neither detachment of paint, applied on the pretreated panel with iron phosphate salts.

The painting cycle and materials allow a resistance up to level "C4 Low" according to standard ISO 12944.

It is possible to arrive up to a level "C5 medium" with a dedicate painting cycle.

Climatic conditions:

Operating temperature : -5°C to + 40° C

Stocking temperature: - 10°C to + 70°C

5. CONFORMITY AND APPROVALS

Conform with standards: IEC 61439-2

Fire resistance according to IEC 60695-2-1 750°C/5s

6. EQUIPMENT AND ACCESSORIES

6.1 Equipment

The cabinets are suitable for installation of different types of equipments:

- DPX³
- DRX
- Modular switches (MCB)

6.2 Ground connection

Provided with the support for the ground connection.

6.3 Mounting brackets installation

6.4 Joining kit installation

6.5 Dry wall installation

With specific accessory the enclosure can be fixed in dry walls.

The accessory is composed by a set of fixing supports and the fixing screws (fixing screws for drywall not included).
