ÖLFLEX® CLASSIC 110 SY

Application

ÖLFLEX® CLASSIC 110 SY cables are VDE approved power and control cables for occasional flexible use and fixed installation for medium mechanical stresses. They are among others designed for use in dry, damp and wet conditions. If using outdoors, observe the indicated temperature range and use with UV protection. They are largely resistant to acids, alkalis and certain oils at room temperature. They are suitable for occasional, non-automated movements. The maximum tensile load is 15 N/mm² of conductor cross-section during

installation and operation. Compulsory guidance is not permitted. The braid of galvanized steel-wires is an additional mechanical protection.

Application range:

As power and connecting cable in plant engineering and construction, industrial machinery and in heating and air-conditioning systems as well as in areas with high mechanical stress.

Design

Design based or

EN 50525-2-51 resp. VDE 0285-525-2-51

Conductor fine wire strands of bare copper, acc. to IEC 60228 resp. VDE 0295, class 5

Insulation PVC compound TI2 acc. to DIN EN 50363-3 resp. VDE 0207-363-3

with increased requirements acc. to Lapp specification

Core identification code acc. to VDE 0293-1, with or without GN/YE ground conductor

black cores with white numbers acc. to DIN EN 50334 resp. VDE 0293-334

Stranding cores are stranded in layers

Inner sheath PVC compound TM2 acc. to EN 50363-4-1 resp. VDE 0207-363-4-1

colour: silver grey, similar RAL 7001

Braid braid of galvanized steel-wires, coverage = 70 % (nominal value)

Outer sheath PVC compound TM2 acc. to EN 50363-4-1 resp. VDE 0207-363-4-1

colour: transparent

Electrical properties at 20°C

Rated voltage $U_0 / U: 300 / 500 V$ Test voltage core / core: 4000 V ACcore / screen: 4000 V AC

Mechanical and thermal properties

Minimum bending radius occasional flexing: 20 x cable diameter

fixed installation: 6 x cable diameter

Temperature range occasional flexing: - 5 °C up to +70 °C max. conductor temp.

fixed installation: - 40°C up to +80°C max. conductor temp.

Flammability acc. to IEC 60332-1-2 resp. VDE 0482-332-1-2 Tests acc. to IEC 60811, EN 50395, EN 50396

General requirements These cables are conform to the EU-Directive 2014/35/EU (Low Voltage Directive)
