## TECHNICAL SPECIFICATION

## Power supplies

The DRP-xx-xx series of power supplies are voltage reduction and rectification units ideally suited to provide stable power supply of systems and equipment for contactfree movement monitoring elements (such as inductive, capacity and photo sensors, logic elements and systems, etc.). They have small overall dimensions and can be installed on a DIN rail. The power units have metal or plastic cases resistant to vibrations and plastic oil- and waterproof covers. They are able to provide stable output voltage at comparatively fluctuating input voltage. Devices have built-in overload and short circuit protection, allowing short time overload of up to $130 \%$. Power supplies are available with various output voltages (5, 12, 15 and 24 V DC) and different output power rates.

## Technical data:

- Input voltage: 80 ~ 230 V AC
- Over-voltage: $115 \sim 135 \%$ of the rated output voltage
- Overload: $120 \sim 120 \%$ of the rated output power
- Terminals: Input - 2 screw terminals; Output: 4 screw terminals;
- IP code: IP44
- Power indicator
- Installation: DIN rail
- Cooling: Free air cooling convection
