

TECHNICAL SPECIFICATION

Heat shrinkage tubes ZDG type

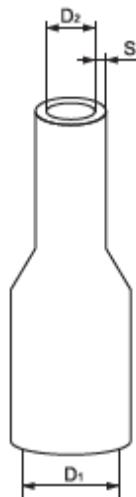

Description:

Thin-wall heat shrinkage tubes are used for insulation of cable connection, at conductors repair to protect the cable head from corrosion, for protection of the cable insulation from water and moisture, for restoring the cable insulation integrity, etc. It is a plastic thin wall pipe which at temperature higher than 120°C shrinks its initial diameter to a certain degree. The material has high temperature and UV rays wear resistance. The material represents the so called permanently netted plastic. This material is obtained as the plastic billet is processed with the help of high energy electron rays so that inner molecular bonds between adjacent molecules are formed. After that the pipe is heated to the boiling point, the pipe inflates, so do the inner molecular bonds. Then the pipe is sharply refrigerated and the molecules stay in the condition of inflated bonds for indefinite long time. Heating the pipe repeatedly (after being mounted to the given cable) the crystals melt again but due to the net structure, they resume the initial pipe diameter and take the form of the cable, pressing it and not allowing the moisture to get under the pipe.

Technical data:

- Material: triple cross – linked polyolefin
- Colours: blue, black, red, yellow, yellow-green, green, white
- Shrinkage ratio: min 2 : 1
- Ambient temperature: -40 to + 100°C
- Shrinkage temperature: min 120°C
- Condition of the material during fire exposure: slight burning
- The material does not emit hazardous substances
- Insulation resistance: $1 \times 10^{12} \Omega/\text{cm}$
- Application: general
- Insulating voltage 1000 V

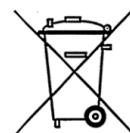

Dimensions:

Standards:

EN 60684

EN 62321

Variants:

Type	D1 (mm)	D2 (mm)	S (mm)	Packing / Box (m)	Catalogue number
ZDG	1	0.5	0.04	200 / 4000	301001x
ZDG	1.5	0.75	0.04	200 / 4000	301115x
ZDG	2	1.0	0.05	200 / 4000	301002x
