

LONDON SERIES

The LONDON series is a range of sockets, switches and modular ancillary products that combine function and style. The design is smooth, clean and the products are very slim. LONDON is the choice in modern, contemporary or traditional interiors where style and detail are the desired effect.

Benefits

- **Ultra slim profile frontplates of only 4mm**

A clean and practical range of products that complement the finest interiors.

- **Total safety**

“Child resistant shutter system”, which is designed to inhibit access to the electricity supply by the children

- **Comprehensive range of sockets, switches and modular ancillary products**

Mean that whatever the application, the LONDON has a wiring device to suit.

Applications

Recommended for residential and commercial environments, like a combination of beautiful design, refinement and reliable performance.

Variants and Dimensions

The series is available in two colors: White and Stainless steel

- **SMALL BUTTON SWITCHES**
