WIFI INFRARED ALARM SENSOR

FUNCTION »

∴ How it works:
   When someone is detected by the infrared sensor, it will send alarm signal to the smartphone via APP.

∴ Indicator Light:
   Rapid blink: WiFi configuration in Smart mode (2 times/second).
   **Double blink:** Connecting to WiFi.
   Steady On: WiFi connected, connecting to the Cloud.

∴ Low Battery Indicator:
   When the battery is low (<3.3V), a push notification will be sent to the APP for an alert.
