APLICA LED CU SENZOR SI AVARIE 10W/ LED SENSOR LAMP WITH EMERGENCY 10W

Prezentare generala/General presentation:

- Senzorul de miscare comanda temporizat iluminatul aplicii la detectia miscarii persoanelor, in functie de luminozitatea existenta/The motion sensor controls the illumination of the lamp on the motion detection of people, depending on the brightness.
- Senzorul are doua butoane pentru reglajul pragului de luminozitate si al timpului de intarziere/The sensor has two buttons for adjusting the brightness threshold and the delay time.
- In conditii de detectare a miscarii si atunci cand luminozitatea este sub pragul selectat aplică se aprinde/Under motion detection conditions and when the brightness is below the selected threshold, the lamp lights up.
- Aplica functioneaza continuu (fara intreruperi), daca persoana se afla sub senzor/The lamp operates continuously (without interruption) if the person is under the sensor.

Prezentare produse/Products presentation:

| No. | Cod produs/Product code | Denumire/Name |
|-----|-------------------------|-----------------------------------|
| 1 | MF0011-11700 | APLICA LED SENZOR+AVARIE 10W ALBA |

Caracteristici tehnice/Technical characteristics:

| | |
|--|--|
| Standard/Standard* | EN55015; EN60598; EN61000; EN61058; EN61347; EN61547 |
| Tensiune nominala/Rated voltage | 220-240 V ca; 50 Hz |
| Putere nominala/Rated power | 10 W |
| Flux luminos/Luminous flux | 850 lm |
| Culoare lumina/Light color | alb rece/cool white |
| Putere nominala avarie/Emergency rated power | 1.2 W |
| Flux luminos avarie/Emergency luminous flux | 130 lm |
| Baterie/Battery | 3.7 V 1500 mAh |
| Autonomie/Autonomy | pana la 5 ore/up to 5 hours |
| Lumina ambianta/Ambient light | <3 - 2000 LUX |
| Timpul de intarziere/Time delay | min. 10 sec. ± 3 sec. - max. 5 min. ± 10 sec. |
| Unghi de detectie/Detection range | max. 140° |
| Distanta de detectie/Detection distance | max. 9 m (<24°C) |
| Inaltimea de instalare/Installation height | 1.8 - 2.5 m |
| Viteza detectare/Detection motion speed | 0.6 - 1.5 m/s |
| Reglaj luminozitate/Adjustable ambient light | da/yes |
| Reglaj temporizare/Adjustable time delay | da/yes |
| Montaj/Installation | aparent, pe perete/on surface, on the wall |
| Grad de protectie/IP protection | IP54 |
| Dimensiuni/Size HxLxA | 250x65x185 |
| Temperatura/Working temperature | -20°C ... +40°C |
| Umiditatea de lucru/Working humidity | 20°C : 93% |

*Produsele au fost testate si nu pun in pericol securitatea oamenilor sau a animalelor domestice, nu produc un impact negativ asupra mediului, indeplinind cerintele impuse de standarde privind compatibilitatea electromagnetică/The equipment was tested and does not endanger the safety of people, animals or property when properly installed and maintained and used in applications for which it was made.

Instructiuni de montaj/Assembling instructions:

- Opriti alimentarea de la retea/Switch off the power.
- Scoateti capacul de pe spatele aplicii, apoi treceti cablul de alimentare prin presetupa de pe acesta/Remove the cover from the back of the lamp, then pass the power cord through the cable gland.
- Fixati capacul pe perete, in dibluri si holtsuruburi si legati cablul de alimentare in cele doua borne "L" si "N" (faza si nul)/Attach the cover to the wall, into dowels and screws and connect the power cord to the two "L" and "N" terminals (line and neutral).
- Fixati aplică pe perete si porniti alimentarea de la retea/Fix the lamp on the wall and switch on the power.

Testare/Test:

- Se roteste butonul de temporizare in sens anterior, la valoarea minima; se roteste butonul de luminozitate in sens orar, la valoarea maxima - "Soare"/Turn time knob anti-clockwise to the minimum; turn the lux knob clockwise to the maximum - "Sun".
- Se alimenteaza cu energie. Senzorul intra in stare de lucru la aproximativ 5-30 sec. dupa alimentare/Switch on power. The sensor enters the working state at approximately 5-30 sec. after switching on power.
- Daca senzorul detecteaza miscare, aplica se va aprinde/If the sensor detects movement, the lamp will light up.
- Daca senzorul nu mai detecteaza miscare, aplica se va stinge in aproximativ 10 sec/If the sensor no longer detects movement, the lamp will turn off in about 10 sec.
- Se roteste butonul de luminozitate in sens anterior, la valoarea minima - "Luna"/Turn the lux knob anti-clockwise to the minimum - "Moon".
- Daca lumina ambientala depaseste valoarea minima (3 LUX) atunci senzorul nu va functiona/If the ambient light exceeds the minimum value (3 LUX) then the sensor will not work.
- Senzorul va functiona daca se va acoperi fereastra de detectie cu un obiect opac (ex: un prosop)/The sensor will work if the detection window is covered with an opaque object (eg. a towel).
- Daca senzorul nu mai detecteaza miscare, aplica se va stinge in aproximativ 10 sec/If the sensor no longer detects movement, the lamp will turn off in about 10 sec.

Observatie: daca testarea are loc in timpul zilei, pragul luminozitatii trebuie setat la valoarea maxima ("Soare"), altfel este posibil ca aplica sa nu functioneze/**Note:** when testing in daylight, please turn LUX knob to maximum position ("Sun"), otherwise the lamp could not work.

Atentie!/Attention!

- Montajul va fi facut de un electrician/The installation will be done by an electrician.
- In fata senzorului nu trebuie sa existe obstacole sau obiecte in miscare care sa influenteze unghiul de detectie/There must be no obstructions or moving objects in front of the sensor to influence the detection angle.
- Nu se va monta in zone cu variatii de temperatura (ex: langa un aparat de aer conditionat, langa o centrala termica, etc)/Do not install in areas with temperature variations (eg. near an air conditioner, near a central heating system, etc.).
