OFF-GRID SINGLE-PHASE SOLAR SYSTEM WITH POWER OF 2000W - SET

The available 2000W kit is extremely compact and easy to carry. The quality of the electricity it produces is stable and comparable to that of mains electricity. Its compact size and mobility makes it extremely suitable for powering small off-grid consumers. The battery and inverter are housed in a wheeled case with a handle, and the solar panel is in a convenient carry bag.

In addition to sunlight, the inverter's lithium-ion battery can be charged from the mains (220V) or from a car battery (12V). The inverter has many different types and voltages of output ports, making it a versatile device suitable for powering appliances with different purposes.
