Tender Text

Overhead hanger, for mounting on horizontal ceilings, including proportional fastening accessories in stainless steel. For structural reasons, it is necessary to install the distance piece TKSD 20 E3 during ceiling installation to avoid deformation of the trapezoidal profile when tightening the fastening screw. Please order fastening screw SKM 10X25 E3 to DIN EN ISO 4017 separately. The distance piece TKSD 20 E3 is also required for overhead hanger mounting with bracket on both sides. Please order fastening screw SKM 10X70 E3 to DIN EN ISO 4017 separately. The load-bearing capacity data only apply if there is sufficient anchoring to the load-bearing substrate or if the installation on suspended standards is in accordance with the regulations. In order to enable the protective cap to be fitted without problems, the bracket must be mounted at a distance of X = 50 mm (lower edge of bracket - end of suspended support), above the end of the suspended support.
