Tender Text

Conduit clamp with expansion compensation, with trough and M 6 stud bolt with multiple drive, including lock nut to secure against vibrations, for steel armored pipes (Stapa pipes), pipes that are exposed to major temperature fluctuations must not be rigidly connected to the load-bearing substrate, when the clamp is tightened, the pipe remains freely movable and does not resist the natural length change of the pipe, suitable for fastening copper pipes. Stainless steel shims DRSU... are available for fastening to existing galvanized profiles with 16 - 17 mm slot width and 30 mm width. which counteract stress corrosion between the C-profile and the pipe (please order separately).
Used for: anchor/profile rails : 2970 E3 (or equivalent material quality) with 16 - 17 mm slot width
