## Installation Notes

### Installation

By snapping a ground conductor terminal block onto the carrier rail, a direct electrical connection is automatically made to the rail.

Removing a terminal block from the assembly.

### Commoning

Commoning ground conductor terminal blocks with through terminal blocks is possible in one direction only (via rear side of terminal block) using adjacent jumpers. In addition to the required marking of these blocks, use yellow-green adjacent jumpers.

Supus modificărilor.

The 35 mm<sup>2</sup> (2 AWG) terminal blocks are the latest addition to WAGO TOPJOB®, the professional range of rail-mount terminal blocks for building installations. These terminal blocks, which include an end plate, are just 16 mm wide. Their compact design allows them to fit into standard distribution boxes. The lower conductor entry angle makes it much easier to terminate 35 mm<sup>2</sup> (2 AWG) conductors.

Furthermore, the N-busbar holder is integrated into the terminal block, eliminating separate holders.

#### Marking

Labeling via WMB Multi markers and WFB continuous marking strips.
