

# MIDWIVES IN THE SERVICE OF LIFE

Bangladesh is becoming a model of midwifery development. The services of a professional midwife can save lives and improve the health of women and children.

We want to encourage and inspire the leaders, globally and nationally, to invest in midwives as the government of Bangladesh has done.

**Midwives in the service of life • Midwives in Bangladesh**

A documentation of a unique stage of midwifery development in Bangladesh.

Project Midwives in Bangladesh - a joint collaboration between Bangladesh Midwifery Society and the Swedish Association of Midwives. The management in Bangladesh was coordinated through a consultant with technical assistant from UNFPA.

The project was funded by the Embassy of Sweden Dhaka.
