Caseload midwifery, vad säger forskningen?

Huddinge sjukhus Lokal C1.87

23 april 2019 14-16

Varmt välkommen att lyssna på tre barnmorskor och professorer. Under två timmar föreläser Helen Mc Lachlan, Della Forster och Jane Sandall om vårdformen Caseload midwifery.

Helen Mc Lachlan Professor of midwifery

Helen McLachlan is Professor at the Judith Lumley Centre and Discipline Lead (Midwifery) in the School of Nursing and Midwifery, La Trobe University, Melbourne, Australia. Helen's research interests include models of maternity care including caseload midwifery, perinatal depression, and breastfeeding. Helen was the lead Investigator on the COSMOS randomised controlled trial of caseload midwifery. She is currently leading a major NHMRC funded partnership project which is exploring the implementation of a caseload model for Aboriginal women at four health services in Victoria, Australia.

Theme: Improving the health of Aboriginal mothers and babies in Australia. Can we make a difference through midwifery continuity of care?

Della Forster Professor of midwifery

Della is a leading international researcher in maternal and infant care. She has a joint appointment as the Professor of Midwifery and Maternity Services Research with the Judith Lumley Centre, La Trobe University and the Royal Women's Hospital, and extensive experience as a clinical midwife. Her main research areas are models of maternity care, perinatal mental health, and breastfeeding.

Theme: Exploring the feasibility of conducting an international multi-site randomised controlled trial to test if caseload midwifery improves outcomes for migrant and refugee women

Jane Sandall Professor of midwifery

Professor Kings College London. I am a NIHR Senior Investigator and Cochrane author. I am an Adjunct Professor, in the Faculty of Health, University of Technology, Sydney and have been awarded an Honorary Doctorate by the University of Technology, Sydney. I was external advisor to the National Maternity Strategy Steering Group for Ireland, and deputy Chair of the Royal College of Midwives Board. I am Associate Editor of Midwifery: an International Journal and sit on the NHS England-London Strategic Clinical Network for Maternity.

My research in maternal health and reproduction is interdisciplinary between the clinical and social sciences and involves a range of methods. It focuses on a) the implementation of maternal health policy and effective solutions at a health system and service delivery level, and the impact on health outcomes and users' experiences, to improve quality and safety of care b) the social and organisational implications of the translation of innovative health technologies into health care.

Theme: Why does Caseload work - a hypothesis. Presentation of the The Poppie trial- London
