As a Webmaster/Designer/Developer at VSE Corporation, a leading engineering and technical services company, I leverage my 20 years of overall experience and expertise to create websites and apps that meet the needs and expectations of various clients and stakeholders. I work with SharePoint, Drupal, WordPress, Grav, Hugo, and Eleventy, as well as low code platforms such as Power Automate.

I strive to deliver high-quality, user-friendly, and responsive solutions that enhance the functionality and usability of the web platforms and systems that I work with. I collaborate with cross-functional teams, support and train end-users, and troubleshoot issues. I also keep abreast of the latest trends and technologies in the web development field and continuously seek to improve my skills and knowledge.

EXPERIENCE

WEBMASTER/DESIGNER/DEVELOPER   **04/2019 – Present**

VSE Corporation | Alexandria, VA

- Design and develop Drupal, WordPress, and Grav sites, utilizing WCAG and Section 508 standards using PHP, Twig, HTML, CSS, JS, Markdown, YAML, and command line tools.
- Design and develop websites using Hugo and Eleventy static site generators, along with Adobe tools, HTML, CSS3, JavaScript, GIT, Azure DevOps with CI/CD.
- Manage Google Analytics properties, produce reports and present findings to stakeholders.
- Provide content management for intranet/internet sites while also responding to tickets, emails, and phone calls providing guidance and resolutions.
- Perform system patches and updates on CMS systems.
- Manage Azure App Services used for website hosting, standing up dev, staging, and production environments.
- Set up SharePoint sites providing administration and user management using AvePoint MyHub.
- Use SPFx and React to develop custom SharePoint Extensions for custom branding and survey/form integrations.
- Develop low-code applications using SharePoint Lists, Power Automate, JavaScript, and Plumsail framework.
- Manage partnership with Microsoft collaborator to facilitate Office 365 training for users.
- Conduct organizational outreach using HTML emails and surveys to determine user needs and requirements for training topics and strategies.

WEB DESIGNER/DEVELOPER   **06/2014 – 04/2019**

Akimeka, LLC/Energetics Incorporated | Columbia, MD

- Provided design and front-end development for over 18 Akimeka and Energetics public-facing websites.
- Developed web pages/skins/themes, utilizing Section 508 standards, cross-browser compatible markup and front-end code for static and CMS-based websites (WordPress, Drupal, DotNetNuke).
- Designed and developed the 2015-2016 version of Mission Innovation's global outreach website, winning The Society for Technical Communication Award of Excellence.

- Participated in requirements gathering, working closely with writers, developers and project managers to help develop presentations, proposals, and documents.
- Developed UI for Hawaiian Electric's Interconnection tool and developed advanced CSS to match corporate brand identity, utilizing the Grid Unity Platform.
- Designed and developed the AFN Now registration and account management portal, using the ServiceNow platform, collaborating with multiple teams from Akimeka, U.S. Military, and Verizon.
- Designed and developed responsive HTML emails for marketing campaigns.

SENIOR INTERACTIVE DEVELOPER   01/2014 – 06/2014

Havas Discovery | Baltimore, Maryland

- Used Jira to manage projects, tasks, DevOps, and bug tracking.
- Assisted with the day-to-day maintenance of Sonic Drive-In's ASP.NET MVC website.
- Supported client-services and creative teams by providing UX assets that included wireframes, mock-ups and concepts.
- Assisted in the development of Michelob Ultra's campaign website incorporating mobile-responsive design and development methods.
- Worked collaboratively to develop the Power of Virtuwatt campaign website for Constellation Energy using touch/swipe technology.
- Produced mobile-responsive emails for Sony Playstation, Liberty Mutual, and Dish Network using best practices ensuring cross-platform, cross-browser, and cross-device compatibility, using Litmus and Email-on-Acid.
- Developed HTML5 Display Ads for Biogen Idec incorporating CSS animations and JavaScript.

WEB DESIGNER   03/2010 – 1/2014

Energetics Incorporated | Columbia, Maryland

- Provided web design, front-end web development, website maintenance for the Energetics IT group.
- Supported the Department of Energy's Office of Energy Efficiency and Renewable Energy working with various program managers to provide content administration on DOE's Drupal platform.
- Responsible for creating wireframes, mockups, prototypes and UI designs using Adobe Creative Suite.
- Developed web sites and pages utilizing industry standard techniques. Ensured content layouts were accessible.
- Tested and debugged web pages for cross-browser compatibility.
- Produced Section 508 compliant PDFs and web content.
- Assessed new standards, technologies and trends, to help formulate strategies for future implementation

WEB PRODUCER   09/2007 – 01/2010

Thunder Creek | Baltimore, Maryland

- Worked with Blizzard Entertainment to develop ecommerce websites under SwagDog brand, selling licensed apparel reaching millions of online gamers.
- Managed all web properties of SwagDog.com, providing web design and front-end development, content management and SEO.

- Designed layouts and UI elements, translating to code for integration with .NET based AspDotNetStorefront and ProductCart shopping cart platforms.
- Drove sales through the creation of digital marketing materials for email and banner ad campaigns.

WEB DESIGNER   **12/2004 – 09/2007**

Quad-B Systems | Buffalo, NY
- Designed and developed static websites using Adobe Creative Suite, HTML, and CSS.
- Produced Joomla CMS websites, developing custom designs, layouts, and stylesheets.
- Assisted in the development and implementation of website content.
- Produced creative media and visual materials for websites and marketing promotions.
