

AROGA®

IMMUNE SUPPORT

WELLNESS BEGINS WITHIN®

Our immune system is responsible for protecting our bodies. It is made up of nonspecific elements like skin that defends against everything outside of your body, and B and T cells that defend against everything inside of your body. The major organs of the immune system are the thymus, bone marrow, spleen, tonsils, and lymphatic tissues.

The body is designed to stay healthy. When our body's cells become old or damaged, they must be repaired or, if repair is not possible, replaced by young, healthy cells. Apoptosis, and its associated pathways, is the process by which the cells that make up our bodies are either repaired, or, if repair is not possible, are removed so that they can be replaced by new, healthy cells. These processes (repair, removal, rejuvenation) take place every minute of our lives, and are necessary for optimal health.

Aroga Pathways Plus Immune Support provides nutrients, not normally found in the modern Western diet, required for the immune system to be rejuvenated and function optimally.

Each capsule (all-vegetable) of Aroga Pathways Plus Immune Support is based on cutting-edge cellular science, and consists of 100% plant-based nutrients, contains no fillers or binding agents, and is hand-filled in the USA.
