

High loft jacket - 500 - Unisex

MATERIAL SPECS: 74 g/m2 100 % Polyester Ripstop with Durable Water Resistant Finish, Insulation: 100 g/m2

High Loft Jacket is an extremely cold weather layer, worn when protection against the most difficult environments is needed. Advanced materials and design reduce weight and volume and increase durability. We have optimized the functionality to give you maximum performance. It has a modern, comfortable shape. Can be used at low temperatures. Wearing tests emphasize the comfort, ease of wearing and versatility of wearing. The jacket has elasticated collar at body side, ensuring to keep warmth even during cold weather. To ensure a good fit at the sleeves end, the product has knitted cuffs

It can be compressed into the supplied compression bag and then easily stored in your backpack.
